MOORFIELDS EYE HOSPITAL NHS FOUNDATION TRUST
PUBLIC BOARD MEETING – 4 February 2026
Chief Executive's report

Performance, Quality and Activity Review

In December, the trust's performance against the 18-week standard improved to 84.5% of patients being treated within the required standard, and the total number of patients waiting over 52 weeks for their treatment reduced to 13. The 18-week wait position continues to be challenged by the performance in three specialist services at City Road, however over the past three months, these specialities have undertaken additional activity to improve their performance. The 52-week wait position continues to improve now that there has been a full recovery from the referral incident which occurred last year.

Both elective and outpatient activity levels remain under plan year to date, however this has now been matched by a reduction of expenditure in relevant areas of the organisation.

Financial Performance – Month 9

For December the trust reported a £0.6m deficit in month, £1.3m favourable to the planned deficit of £1.9m in month. Cumulatively the trust is reporting a £2.0m surplus YTD, £5.5m favourable to the £3.5m planned deficit YTD

Patient activity during December was 92% for elective, 96% for outpatient first appointment, and 98% against outpatient follow up activity. The trust is reporting an over-performance in high-cost drug/injection income which remains a variable payable element under the new contracting arrangements.

The trust has a £15.1m internal efficiencies plan for the financial year. The cost improvement programme is forecasting £14.3m against the £(0.8)m gap to plan.

The cash balance as at the 31 December was £76.6m, a reduction of £9.5m since the end of March 2025. The trust currently has 86 days of operating cash (prior month: 98 days).

Capital expenditure as of 31 December totalled £101.5m, predominantly Oriel related/EPR related.

Sector Update

NHS England

NHS England have been clear on expectations of performance for the remainder of the year. All trusts are expected to deliver on both their 18 week RTT plans and on the clearance of 65 week wait patients.

With regard to long waiting patients we were required to write to the Regional Director at the end of December outlining our plans to deliver. At this stage we declared two over 65 week patients. Both of these patients have now been discharged.

Delivering on our end of year RTT target will be more challenging. This requires us to achieve performance of 87.6% as at the end of March, a 3 percentage point improvement on the current position. We have already implemented additional measures to improve our performance but our modelling suggests that this will still leave us short and so we are reviewing additional plans.

We are also offering mutual aid to Kings College Hospital to help with their Ophthalmology RTT position. We have offered to take 68 patients, some of whom are long waiters.

NHSE also continue to closely monitor financial forecasts.

London

The consolidation of ICBs in London continues. North Central London ICB and North West London ICB plan to formally merge on 1 April 2026. The merged ICB will be called "West and North London ICB" and will be the largest in England, covering 13 boroughs and a population of 4.5m residents. The ICB will need to recruit a new CEO as Frances O'Callaghan is leaving to take up a new role as CEO of NHS Blood and Transplant.

Online Hospital

Moorfields was featured this morning in the national press as part of the national announcement of the new NHS Online service. This service is being set up to transform how healthcare is delivered, allowing patients to be triaged quickly through the NHS App, speak to doctors via video consultation, and monitored in the comfort of their home, saving unnecessary trips to hospital.

The initial nine conditions being treated through NHS Online include cataracts, glaucoma and macular degeneration, as well as women's health issues (including severe menopause symptoms and menstrual problems) and prostate problems.

Our Sparc service platform, formerly known as the single point of access system for eye care referrals into us from GPs and optometrists has been used as a case study of digital innovation. We were featured on the BBC and on Good Morning Britain as well as in most national newspapers.

NHSE England included a quote from Pete Thomas, our director of digital development and consultant ophthalmologist in their communications about the new service:

"With our single point of access service, we've been defining how a virtual hospital can support better eye care.

"We've used technology to improve the capability and efficiency of the system, and which allows clinicians in the community and hospital services to work more closely together to streamline care.

"The impact is clear - patients are being seen more quickly in more appropriate settings, and the pressure on NHS services is being reduced."

Elena Bechberger and Pete Thomas are continuing discussions with the national NHSE team on collaboration opportunities for the new online service.

Oriel

Despite some minor delays and a planned shutdown over the Christmas period, the construction and commissioning of the centre continues according to plan. The list of known issues relating to the design are still being worked through, however none of these are expected to cause any problems with the contract completion date.

A specialist contractor has been onboarded to help procure the large volume of equipment which will be required to provide treatment in the new centre and we are about to repeat this process for another contractor who will support our eventual move to the new site.

Our IT workstream continues, including a plan to finalise the active network that a number of our digital systems will be hosted from by March.

Tender responses have been received back to identify a partner to fit out our new administration centre on Granary Street and the naming of the new centre is now likely to be in February 2026.

MoorConnect (Electronic Patient Record)

We have revised our go live for this programme to 3 October 2026 and are performing successfully against this revised timeline. There are some key interdependencies with our external system suppliers and we are therefore tracking these in detail.

Although the design of the system is complete, we are making some final decisions on how best to support key services such as medicines management and anaesthetics. We have now completed four build iterations of the new system, with two more planned. These are getting more complex each time as we work towards building the final version that we will then go live with.

We are steadily increasing the communication and engagement of our staff regarding the new system and are linking this to a number of other exciting digital initiatives including the development of the NHS app and the decommissioning of our CITO system in February.

10-Point plan for resident doctors

Moorfields continues to make progress against NHS England's 10-point plan for resident doctors. Preparations are underway for the February implementation of national exception reporting reforms. However, ongoing lack of clarity and alignment between NHS Employers and the BMA, and the consequent feedback provided to system suppliers, has resulted in a number of recognised flaws in the reformed exception reporting process at national level. These challenges are being experienced across trusts and are not unique to Moorfields.

Despite this, the trust is continuing to progress local readiness, including policy updates and system access, in line with national timelines. Engagement with resident doctors is ongoing to inform rota and workforce planning, with previous feedback already having influenced improved gap management from February. Practical improvements to onboarding, Basic IT access, have been initiated and expense processes are being reviewed to improve the day-one experience for resident doctors, with wider benefits for the medical workforce and other new starters.

People

Employee of the month

October 2025:

- Non-clinical:
- Clinical: Jayna Maniar, Healthcare Assistant, Ealing

November 2025:

- Non-clinical: Jess Humphries, Patient Experience Manager, Quality and Safety - patient experience
- Clinical: Lea Cabaluna, Outpatient Clinical Manager, Moorfields Private

Governor Elections

The Trust's 2026 Governor Election process is now underway, with nominations formally open. Vacancies are being advertised across the following constituencies:

- Public Governor – Bedfordshire and Hertfordshire
- Patient Governor
- Staff Governor – City Road

Nominations will close on 16 February 2026, with voting concluding on 26 March 2026. The election is being managed independently by Mi-Voice on behalf of the Trust to ensure a transparent and robust process.

Moorfields in the News

National impact

- Moorfields continues to be at the heart of national initiatives. Our Sparc single point of access for ophthalmology was featured as a case study in the NHS England press release to announce the first nine conditions to be treated through NHS Online, three of which are eye conditions. Our director of digital development, Dr Peter Thomas, was quoted in the release, as he is supporting NHS England's project. <https://www.bbc.co.uk/news/articles/c62w3wr92npo>
- We have completed diabetic retinopathy and glaucoma videos with NHS England, joining the earlier one on cataracts, to explain care for the condition to those receiving their first referral.

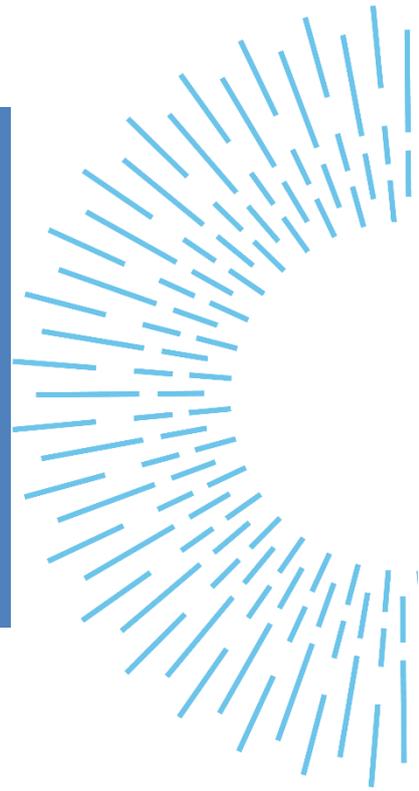

Breakthrough studies published

- Through their persistence and determination, the hypotony team at Moorfields has found a way of treating this condition, which previously led to irreversible sight loss. The publication of their paper, with patient Nicki sharing her experience, was covered widely, including on BBC TV and radio. <https://www.bbc.co.uk/news/articles/c89qyv98lzdo>
- An influential paper on glaucoma, showing its prevalence to be almost 50% higher than current assumptions and explaining how it could rise by a further 60% by 2060, has also been published. The researchers called for anyone over 40 to get their sight checked regularly, as this is the only way it can be detected early for most people. <https://www.ucl.ac.uk/news/2026/jan/over-1-million-estimated-have-glaucoma-uk-0>

Integrated Performance Report
(open version)
Board of directors
4 February 2025

Report title	Integrated Performance Report		
Report from	Executive team		
Prepared by	Stephen Chinn, Performance Reporting Manager		
Previously considered at	NA	Date	NA
Link to strategic objectives	Working Together, Discover, Develop, Deliver, Sustainability and Scale		

Executive Summary

The Integrated Performance Report highlights a series of metrics regarded as Key Indicators of Trust Performance and covers a variety of organisational activities within several directorates including Operations, Quality and Safety, Workforce, Finance and Research.

The report uses a number of mechanisms to put performance into context, showing achievement against target, in comparison to previous periods, and as a trend. The report also identifies additional information and narrative for KPIs, including those showing concern, falling short of target, or highlighting success where targets and improvement have been achieved.

The data within this report represents the submitted performance position, or a provisional position as of the time of report production, which would be subject to change pending validation and submission.

The 18-week RTT incomplete performance has improved again to 84.5%. The RTT waiting list stands at 34,729 pathways, stable but above desired levels, and there are 13 patients breaching the 52-week standard. Targeted RTT recovery plans are in place, supported by additional outpatient sessions, triage backlog clearance and fixed-term posts to increase capacity. At the end of December, there were 2 patients waiting over 65-weeks for treatment. One patient is booked for surgery in January 2026, and one patient has their next outpatient appointment in January 2026.

A&E and Cancer performance remain in compliant positions with no concerns or risks to this.

Theatre utilisation under the MEH definition is at 65.9% and remains below the internal target, despite recent improvement. We are reviewing theatre utilisation in increasing detail and engaging with services to focus on issues at sub-specialty and operating list level. We are preparing to go-live with our new theatre scheduling tool, which will support a more efficient and standardised approach to booking and review theatre lists.

In our call centre, the average call wait time improved to 3 mins and 11 seconds, but the target was not met. There continues to be significant staffing issues which require on-going support. The abandonment rate target was met, reaching 11.7% in December. Digital enablers continue to be targeted to reduce call volumes and further opportunities to digitise the process are being explored.

Outpatient did not attend (DNA) rates remain above our target but are showing sustained improvement for follow-up appointments. We are prioritising actions to reduce our DNA rates by improving patient communication, with a focus on letter content and our approach to issuing reminders.

Elective activity was below plan and reduced in month, due to patients being unavailable for surgery over the Christmas period. We diverted staff to outpatients and increased activity, seeing an improving the position for outpatient attendances and injection activity, in month.

Our compliance with responding within 25 days has improved again to 57.8% and work continues to return to a compliant position by the end of March 2026. Basic Mandatory IG training remains below the required standard at 88.8% and staff sickness rates remain above Trust target at 5.1%. Our sickness absence policy has been reviewed and managers are being supported, with a focus on early intervention

Quality implications							
If the Trust does not achieve the required performance standards, then this is likely to have a significant impact on the quality of care that we are able to provide for our patients.							
Financial implications							
If the Trust does not achieve the required performance, activity and efficiency standards then this is likely to have a significant impact on the income that we receive and the level of expenditure that we incur to deliver care to our patients.							
Risk implications							
If the Trust does not achieve the required performance standards, then this is likely to have a significant impact on the risk that we pose to our patients by not offering timely care							
Action required/recommendation.							
The Board provided with this report for assurance.

Integrated Performance Report

Reporting Period - December 2025

Brief Summary of Report

The Integrated Performance Report highlights a series of metrics regarded as Key Indicators of Trust Performance, and covers a variety of organisational activities within several directorates including Operations, Quality and Safety, Workforce, Finance and Research.

The report uses a number of mechanisms to put performance into context, showing achievement against target, in comparison to previous periods, and as a trend. The report also identifies additional information and narrative for KPIs, including those showing concern, falling short of target, or highlighting success where targets and improvement have been achieved.

The data within this report represents the submitted performance position, or a provisional position as of the time of report production, which would be subject to change pending validation and submission

Performance & Information

Delivering quality data to empower the trust

Introduction to 'SPC' and Making Data Count

Statistical process control (SPC) is an analytical technique that plots data over time. It helps us understand variation and in doing so, guides us to take the most appropriate action.

This report uses a modified version of SPC to identify common cause and special cause variations, and assurance against agreed thresholds and targets. The model has been developed by NHS improvement through the 'Making Data Count' team, which uses the icons as described to the right to provide an aggregated view of how each KPI is performing with statistical rigor.

Guide to Chart Icons

Variation					Assurance		
							
Common Cause: No Significant Change or Variation	Special cause of concerning nature or higher pressure due to (H)igher or (L)ower values	Special cause of improving nature or higher pressure due to (H)igher or (L)ower values	Special cause of showing an increasing trend	Special cause of showing an decreasing trend	Inconsistent passing and failing of the target (" Hit- or-Miss ")	Recent performance or variation indicates consistent passing of the target	Recent performance or variation indicates the target is not consistently met

Common Cause Variation - No significant change or evidence of a change in direction, recent performance is within an expected variation

Special Cause Concern - This indicates that special cause variation is occurring in a metric, with the variation being in an adverse direction. **Low (L)** special cause concern indicates that variation is downward in a KPI where performance is ideally above a target or threshold. **High (H)** is where the variance is upwards for a metric that requires performance to be below a target or threshold.

Special Cause Improvement - This indicates that special cause variation is occurring in a metric, with the variation being in a favourable direction. **Low (L)** special cause concern indicates that variation is upward in a KPI where performance is ideally above a target or threshold. **High (H)** is where the variance is downwards for a metric that requires performance to be below a target or threshold.

Purple arrows - These are metrics with a change in variation which neither represents an improvement or concern

Inconsistent Process - This is where a metric will 'hit-or-miss' (pass or fail) the target during a given period due to variation in performance, so is neither deemed to be a 'Failing' or 'Capable' process.

Capable process (P) - Indicates the metric consistently passes the target, indicating a capable process. To be classified as a capable process, either the target has not been failed for a significant period, or the target falls outside the calculated process limits so would only fail in exceptional circumstances or due to a change in process.

Failing Process (F) - Indicates the metric consistently falls short of the target, and unlikely to ever regularly meet the target without redesign. To be classified as a failing process, either the target would have not been met for a significant period, or the target falls outside the calculated process limits so would only be achieved in exceptional circumstances or due to a change in process.

Guide to Domain Summary Pages

Name of Metric / KPI			Most recent figure, and where available, the financial year (Since April to date) for this metric			Name of the lead (usually director) responsible for the metric	How often this metric is reported, any reporting lag, or when last updated	
Metric Description	Variation	Assurance	Year to Date	Current Period	Target	Metric Lead	Metric Source	Reporting Frequency
18 Week RTT Incomplete Performance			82.0%	80.5%	≥84.0%	Jon Spencer	NHS Oversight Framework	Monthly
% 52 Week RTT Incomplete Breaches			0.07%	0.09%	≤1%	Jon Spencer	NHS Oversight Framework	Monthly
Cancer 28 Day Faster Diagnosis Standard			84.4%	81.0%	80%	Jon Spencer	NHS Oversight Framework	Monthly (Month in Arrears)
% Patients With All Cancers Treated Within 30 Days			98.0%	100.0%	≥85%	Jon Spencer	NHS Oversight Framework	Monthly (Month in Arrears)
A&E Four Hour Performance			97.3%	98.2%	≥95%	Jon Spencer	NHS Oversight Framework	Monthly
% A&E Waits Over Twelve Hours			100.0%	100.0%	No Target Set	Jon Spencer	NHS Oversight Framework	Monthly

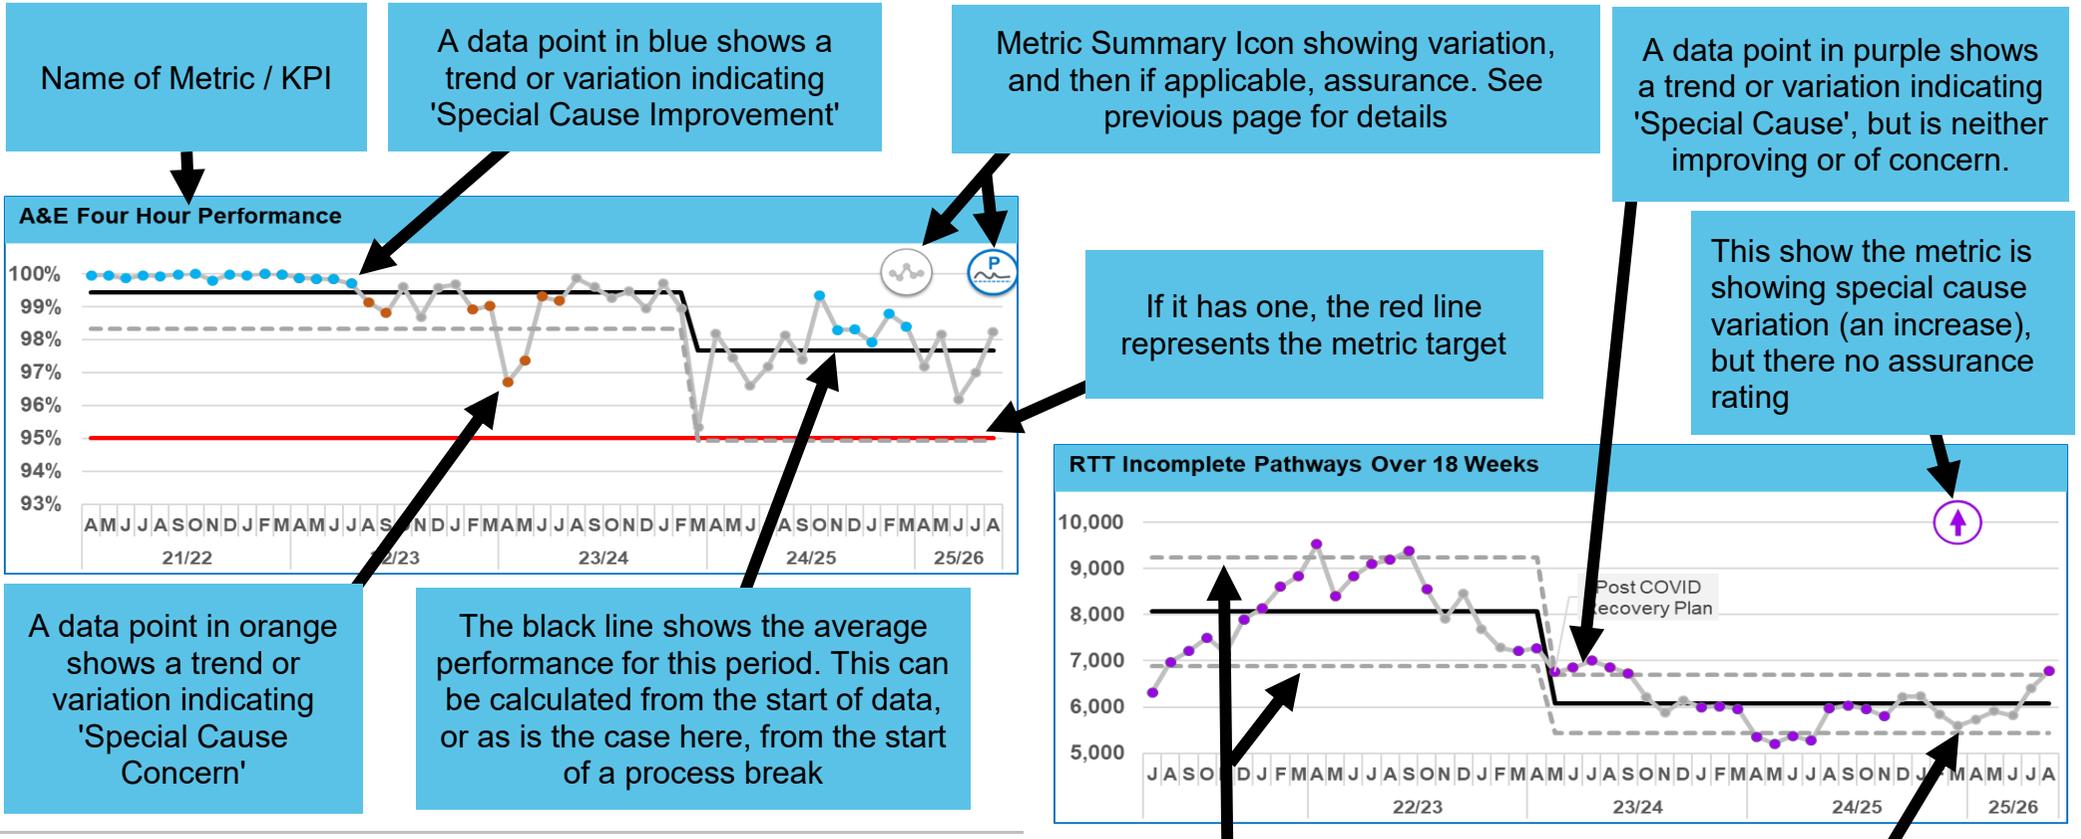

EXAMPLE

These are the Variance and Assurance ratings for this metric (See Previous Page)

Metric Target (if available) - this can be a fixed or part of trajectory

Why is this metric being reported (National Requirement or locally measure)?

Guide to SPC Charts

All SPC charts will also include a short narrative explaining its current variation and assurance score, whether this is a change from the previous month, and the latest performance figure. Additional narrative will be given for key metrics, highlighting the issues and actions associated with recent performance, including any improvement plans.

Upper/Lower Control Limits: These are control limits of where we would expect the performance to fall between. Where they fall outside these limits, special cause will be highlighted.

Recalculation Periods: Where there has been a known change in process or performance has been affected by external events (e.g. COVID), the control limits and average have been recalculated to provide a better comparison of data against that period.

Further Reading / other resources: The NHS Improvement website has a range of resources to support Boards using the Making Data Count methodology, this includes are number of videos explaining the approach and a series of case studies.

[These can be accessed via the following link - https://www.england.nhs.uk/publication/making-data-count/](https://www.england.nhs.uk/publication/making-data-count/)

Metrics With "Failing Process"

- Sickness Absence Rate (Monthly & Rolling Annual)
- 52 Week RTT Incomplete Breaches
- Theatre Utilisation (MEH Definition)
- Average Call Waiting Time
- Cataract Cases Per Four Hour Theatre List
- DNA Rate (First & Follow Up Outpatients)
- Freedom of Information Requests Responded to Within 20 Days
- Basic Mandatory IG Training
- Activity vs. Phased Plan (Elective, and First & Follow Up Outpatient)

Other Metrics showing "Special Cause Concern"

- Number of non-medical cancelled operations not treated within 28 days
- Outpatient Scores from Friends and Family Test - % Response Rate
- A&E Scores from Friends and Family Test - % Response Rate & % Negative
- Recruitment Time To Hire (Days)
- Total patient recruitment to NIHR portfolio adopted studies
- Total patient recruitment to All Research Studies (Moorfields Sites only)
- Proportion of patients participating in research

Celebrations

- In total, 24 Metrics are showing as a capable process, with 20 showing either an improving or stable performance, this includes:
 - Infection Control Metrics
 - % 52 Week RTT Incomplete Breaches
 - A&E Performance
 - 62 Day Cancer Performance
 - Posterior Capsular Rupture rates
 - All FFT Performance Targets
- Nine metrics are also showing an improving position including Theatre Utilisation, Follow DNA Rates, and proportion of Temporary Staffing

Other Areas To Note

- RTT 18 Week Performance has improved over the last five months from 80.5% to 84.5%.
- Year-to-date Cancer FDS Performance remain above target
- Activity vs. Plan for all areas is below plan for December, with only injections above plan for the year to date.

Executive Summary

The 18-week RTT incomplete performance improved for the fourth consecutive month (though still within common cause variation), and is now 84.5%. The RTT waiting list is stable at 34,792 pathways, with 13 currently breaching the 52-week standard. There are 2 patients waiting over 65 weeks, though this is expected to increase due to accepting a mutual aid request from King's College Hospital.

A&E, Cancer & Diagnostics performance remain in compliant positions with no concerns or risks to this. □

Theatre utilisation is showing common cause improvement at 65.9%, but is still below the 85% target. Service deep dives are now starting through our Theatres Oversight Groups to focus on issues are service and operating list level.

The average call wait time improved to 191 seconds, but the target was not met. There continue to be significant staffing issues which require on-going support. The abandonment rate target was met, reaching 11.7% in December. Digital enablers continue to be targeted to reduce call volumes and further opportunities to digitise the process are being explored.

The DNA rate for first outpatient appointments remains high at 13.2% for December. DNA rates are higher in services with high volume asynchronous, diagnostic hub sites and smaller sites.

The acknowledgment of complaints within 3 days was at 88.2% and above the target however, compliance with responding within 25 days continues to be a failing metric at 57.9%.

While still within the bounds of common cause variation, the % negative scores on the Friends and Family Test continues to rise and is at the highest level for over three and a half years. This may be linked with a fall in the response rate.

The sickness absence rate for November 2025 is at 5.13% and remains above the 4% target, with the latest (December 2025) position currently showing an increase to 5.59%. This continues to reflect seasonal pressures and a rise in long term sickness cases.

The Recruitment to Hire metric is now showing as special cause variation at 63 days. While part of this increase reflects the introduction of the Vacancy Control Panel and the additional scrutiny required before adverts go live, we are actively implementing measures to streamline the remainder of the process.

Performance Overview

Access to Services (Referral to Treatment) Graphs 1

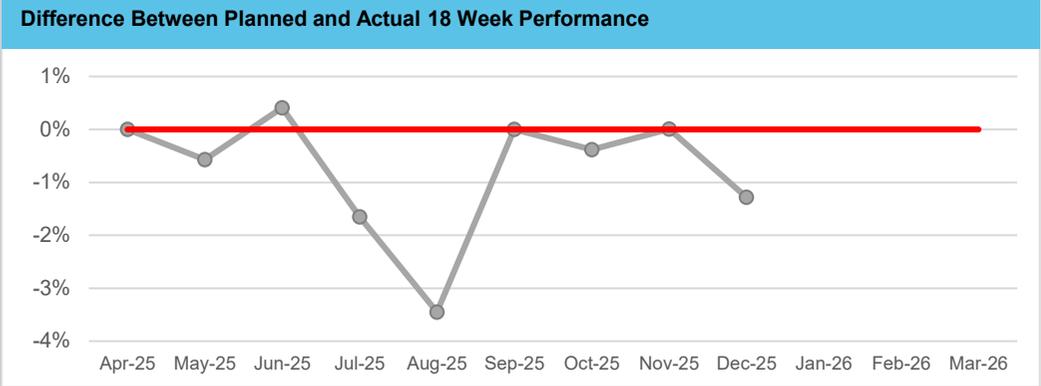

'18 Week RTT Incomplete Performance' is showing 'common cause variation' and that the current process is not consistently achieving the target. The figure is currently at 84.5%.

18-week RTT incomplete performance has improved to 84.5% for December. Targeted intervention is supported by non-recurrent funding in paediatrics, adnexal and external services at City Road and cataract, adnexal and external services at St George's.

We continue to monitor our improvement plans and run additional activity in outpatients and theatres to reduce our waiting times. We are now looking for further opportunities in the final three months of this financial year, to improve our performance further.

Divisions have submitted all service developments as part of this year's business planning round. These requests for investment have not yet been approved and have not been included in the financial plan for 26/27. An RTT model has been developed, estimating that these developments could support delivery of the 92% standard by March 2027; however, there is a wide confidence band on this projection with lower and upper limits of 85% and 99% respectively. The implementation of advice and guidance/advice and refer and centralised triage will be key enablers to RTT improvement, but it is harder to model the impact on performance given we are in pilot stage for much of this work.

'Difference Between Planned and Actual 18 week Performance' is showing that the current process is not consistently achieving the target. The figure is currently at -1.28%.

RTT Incomplete Pathways (RTT Waiting List)

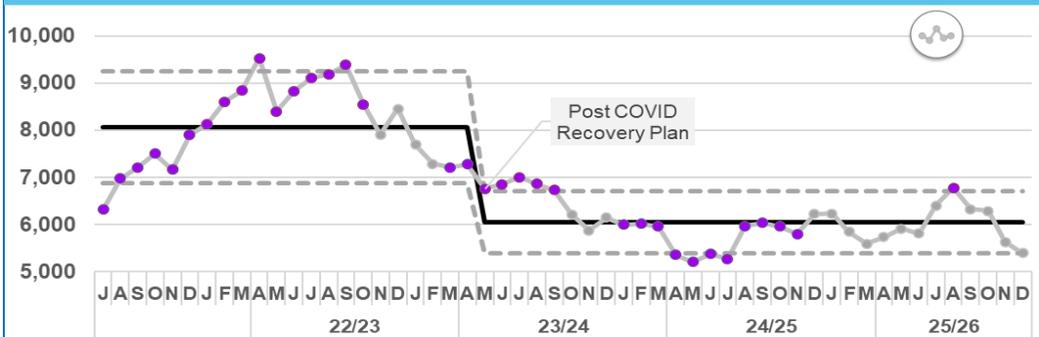

Metric In Development

'RTT Incomplete Pathways (RTT Waiting List)' is showing 'common cause variation'. The figure is currently at 34,792.

'Estimated Time To Clear Current RTT Waiting List' for this reporting period not available.

RTT Incomplete Pathways Over 18 Weeks

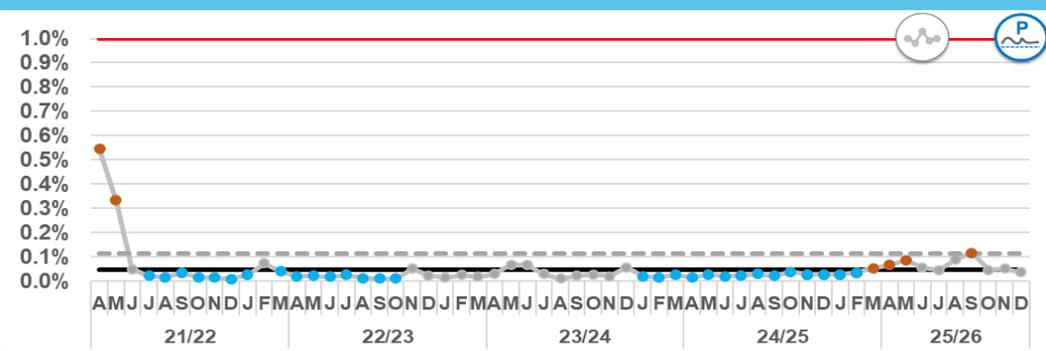

'RTT Incomplete Pathways Over 18 Weeks' is showing 'common cause variation'. The figure is currently at 5,394.

The number of RTT incomplete pathways remains stable at 34,792. We anticipate this number to remain stable with the potential for reduction, as we plan to increase capacity and therefore RTT clock stops to bring the total waiting list down.

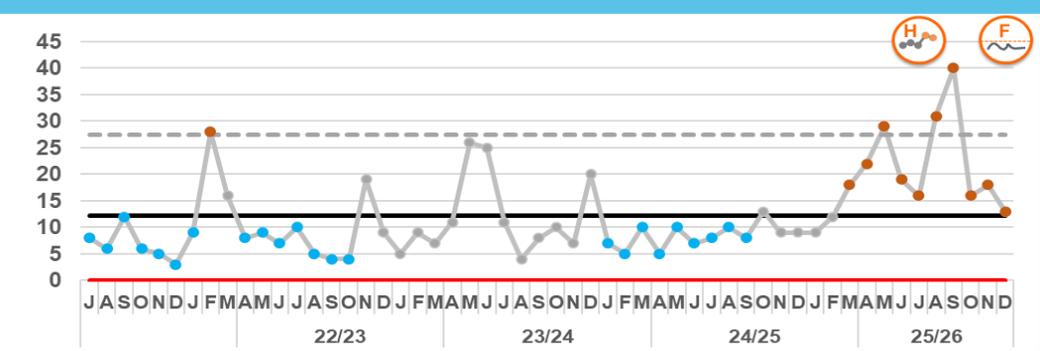

Access to Services (Referral to Treatment) Graphs 3

% 52 Week RTT Incomplete Breaches

'% 52 Week RTT Incomplete Breaches' is showing 'common cause variation' and that the current process will consistently pass the target. The figure is currently at 0.04%.

52 Week RTT Incomplete Breaches

'52 Week RTT Incomplete Breaches' is showing 'special cause concern' and that the current process is unlikely to achieve the target. The figure is currently at 13.

The number of patients over 52 weeks reduced to 13 (0.04%) at the end of December. We continue to monitor all patients over 48 weeks on a weekly basis and forecast the month end position, reviewing and expediting each patient's next event to provide assurance on performance levels.

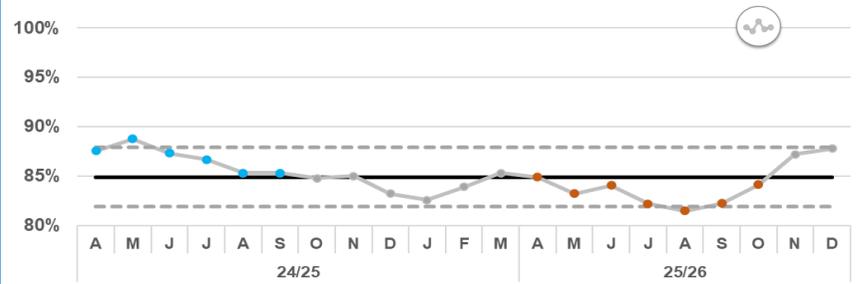

At the end of December, we had two patients waiting over 65 weeks for treatment. These patients were new to the Patient Tracking List (PTL) in December, one has a date for surgery in January and the other has a first outpatient appointment in January. We will expedite treatment if this patient requires surgery.

We have accepted a request for mutual aid from King's College Hospital. These patients have all waited over 65 weeks for treatment and so the number of patients in this cohort will increase. We have plans in place to see and treat these patients as quickly as possible.

Effectiveness and Experience of Care (Admissions) Graphs 1

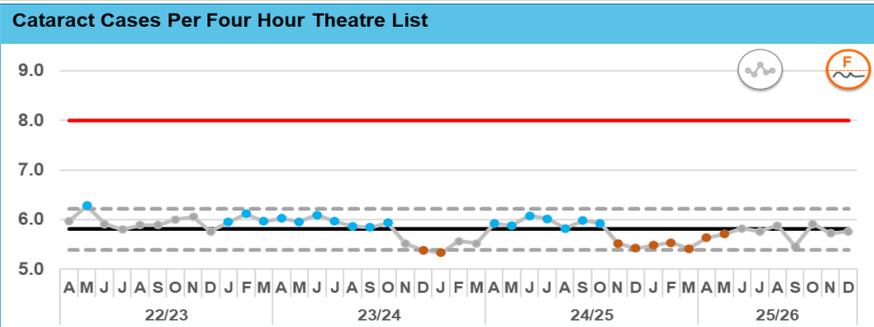

'Number of Non-Elective Patients with Overnight stay' is showing an 'special cause variation' (increasing rate).. The figure is currently at 9.

'Average Length of Stay (ALOS) – non-elective (1+ days)' is showing 'common cause variation'.. The figure is currently at 0.

Metric In Development

'% Day Case Admissions' for this reporting period not available..

'Cataract Cases Per Four Hour Theatre List' is showing 'common cause variation' with the current process unlikely to achieve the target.. The figure is currently at 5.80.

All divisions are reporting an increasing number of consultant-delivered lists being booked to 8 cases and the average for the trust increased to 5.8 in for December. There are still some lists which must be corrected in our Galaxy theatre system to ensure cataract lists are accurately labelled; additional support is now being put in place to complete this. A standard operating procedure for booking theatre lists in the cataract service is being written to support operational teams in scheduling patients.

Effectiveness and Experience of Care (Admissions) Graphs 2

'Theatre Cancellation Rate (Non-Medical Cancellations)' is showing 'common cause variation' and that the current process is not consistently achieving the target. - This is a change from the previous month The figure is currently at 0.79%.

'Number of non-medical cancelled operations not treated within 28 days' is showing 'special cause concern' and that the current process is not consistently achieving the target. - This is a change from the previous month The figure is currently at 10.

Non-medical cancellations

The non-medical cancellation rate increased to 0.79% which is was driven by improvement in South Division due to an improvement in consistency of anaesthetic provision.

Non-medical cancellations rebooked within 28 days

There were ten on the day cancellations not rebooked within 28 days, 8 of which were at City Road. There was an administrative process issue involving the VR service, leading to patients not being rebooked in a timely manner. This has now been corrected. There was also an issue with lens availability and consultant absence causing the remaining breaches. A further review is being undertaken by divisional management teams to prevent re-occurrence, and learning will be shared with operational managers. The important of this performance metric will be communicated again to admissions teams.

Effectiveness and Experience of Care (Outpatients) Graphs 2

'DNA Rate (First Outpatients)' is showing 'common cause variation' with the current process unlikely to achieve the target. The figure is currently at 13.2%.

'DNA Rate (Follow Up Outpatients)' is showing 'special cause improvement' however the current process is unlikely to achieve the target. The figure is currently at 9.9%.

First outpatient DNA rate

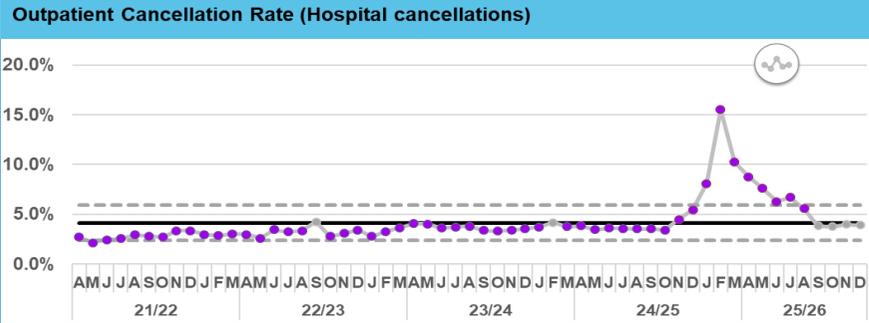

The DNA rate for first outpatient appointments remains high at 13.2% for December. DNA rates are higher in services with high volume asynchronous, diagnostic hub sites and smaller sites. Divisions are also reporting short notice cancellations and DNAs associated with seasonal illness. Current actions to reduce DNA rates include: manual reminder calls, to be replaced by AI reminder calls (in pilot phase); improving patient letter content to improve communication and reviewing booking windows to ensure appropriate notice to patients. Further analysis of the DNA rates, linked to patient demographics, booking windows and route of referral is being undertaken.

Follow-up outpatient DNA rate

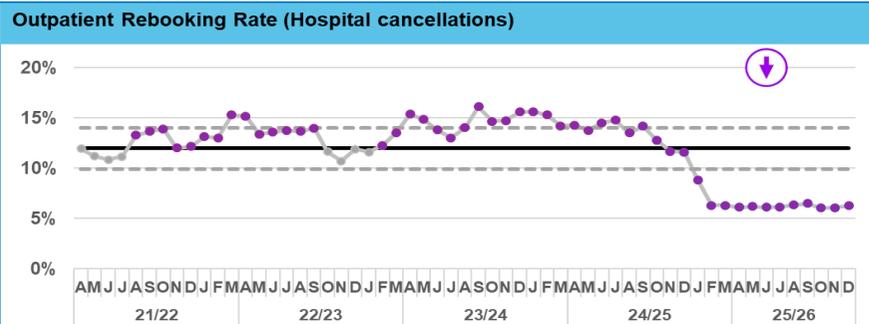

The DNA rate for follow-up outpatient appointments is showing improvement and is stable at 9.9%. The improvement in trend was following the implementation of the follow-up outpatient waiting list. The figure remains above the target of 8.1% and divisions are focusing on outlier sites and services, in addition to the trust wide actions as explained for the first DNA rate.

Review Date: Feb 2026 **Action Lead:** Kathryn Lennon

'Percentage of responses to written complaints acknowledged within 3 days' is showing 'common cause variation' and that the current process is not consistently achieving the target. The figure is currently at 88.2%.

Complaints acknowledgement has achieved above target for four months and is expected to maintain this performance

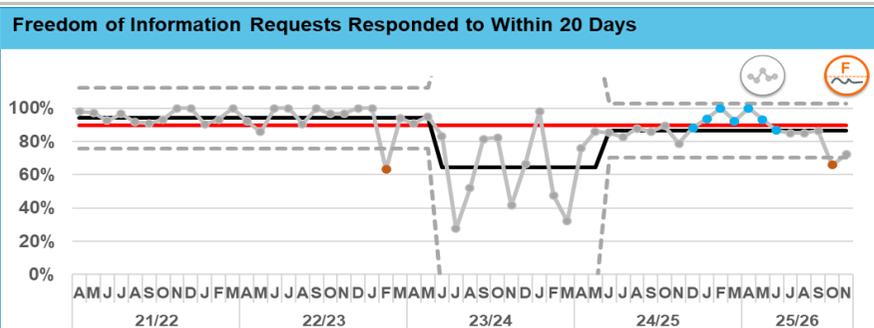

Review Date: Feb 2026 **Action Lead:** Robin Tall

'Percentage of responses to written complaints responded within 25 days' for this reporting period not available. The figure is currently at 57.9%.

Complaints performance continues to improve against the six month recovery plan (1 October 2025 to 31 March 2026). The most recent performance (November) is 57.9%, the best for 2025, on an improving trajectory. In parallel the number of older complaints is also reducing significantly against the recovery plan.

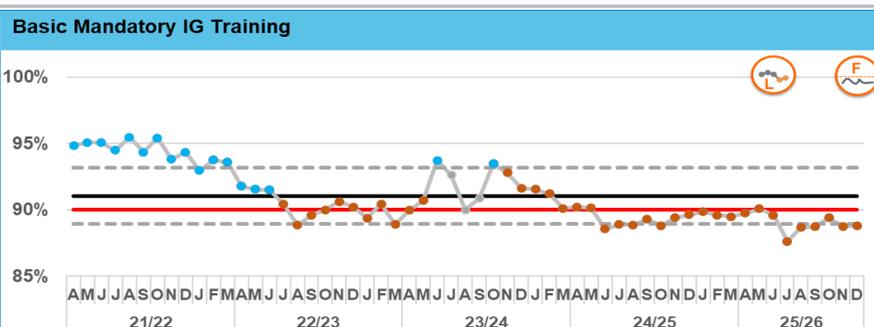

Review Date: Feb 2026 **Action Lead:** Robin Tall

'Freedom of Information Requests Responded to Within 20 Days' is showing 'common cause variation' with the current process unlikely to achieve the target. This is a change from the previous month. The figure is currently at 72.2%.

Management has reviewed the FOI response process. Leads are being appointed in key areas: IT, HR and finance to ensure accurate and timely handling of FOI requests. An escalation process to Directors is in place. Resource issues in the IG team are being addressed to ensure dedicated support for the FOI process. A 'sharing best practice' workshop is taking place to transfer strong practice across other areas. IGC will continue to monitor FOI performance.

Review Date: Feb 2026 **Action Lead:** Jonathan Mckee

'Basic Mandatory IG Training' is showing 'special cause concern' and that the current process is unlikely to achieve the target.. The figure is currently at 88.8%.

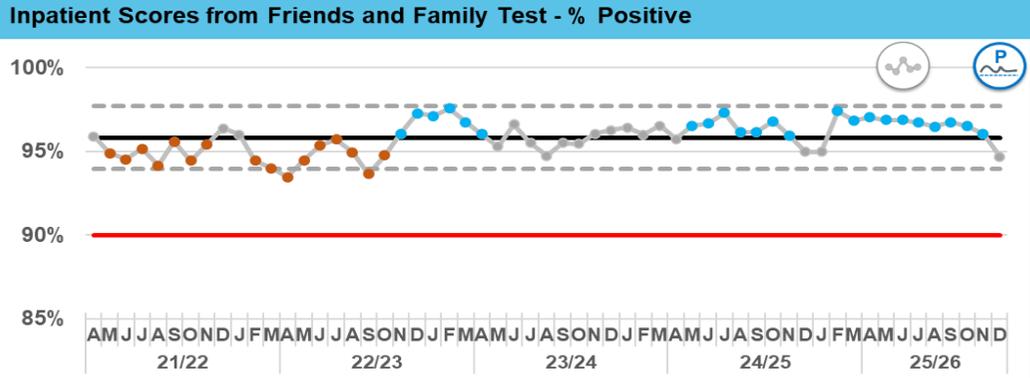

Basic training performance remains just below target of 90%. The IG team will continue to use all mechanisms available to improve this performance including using Senior Management Team (SMT), management cascade, direct approach to teams and individuals, communication tools such as the EyeQ for managers, lock screens and maintaining a high profile of the importance. IGC will continue to monitor performance.

People and Workforce Graphs 1

Sickness Absence Rate (Monthly)

'Sickness Absence Rate (Monthly)' is showing 'special cause concern' and that the current process is unlikely to achieve the target. The figure is currently at 5.1%.

Sickness Absence Rate (Rolling Annual)

'Sickness Absence Rate (Rolling Annual)' is showing 'special cause concern' and that the current process is unlikely to achieve the target. The figure is currently at 5.1%.

The sickness absence rate for November 2025 is at 5.13% and remains above the 4% target, with the latest (December 2025) position currently showing an increase to 5.59%. This continues to reflect seasonal pressures and a rise in long term sickness cases. The top reasons for sickness absence remain consistent with previous months: Anxiety, stress and other psychiatric illnesses, Cold, cough and flu, Musculoskeletal issues, Gastrointestinal problems, Genitourinary and gynaecological conditions

Key Actions and Delivery Milestones

- Completion of governance approval and implementation of the revised Sickness Absence Policy
- Introduction of mandatory Return to Work documentation for all absences, supported by ongoing audit
- Delivery of mandatory ER training for managers on Management of Sickness Absence Policy, with a focus on early intervention and consistent case management
- Target: 95% of Long Term Sickness (LTS) cases referred to Occupational Health within 28 days
- Strengthened oversight of supportive Return to Work conversations and documentation, with a focus on health and wellbeing
- Regular data shared with managers to support timely contact and active case management, including trigger point alerts
- Reinforcement of expectations around maintaining structured, supportive contact with staff on sickness absence
- Launch of the MSK pilot as part of a broader health and wellbeing offer
- Alignment with the new leadership development programme and implementation of HSE Management Standards for risk assessment

Risks and Constraints

Occupational Health capacity may limit the speed of referrals and follow up assessments during peak periods. Manager compliance variability remains a risk, particularly around timely RTW conversations and consistent documentation. Data quality and reporting gaps in some divisions may affect the accuracy of trend analysis and trigger alerts. Sustained seasonal pressures could continue to elevate short term absence rates despite interventions.

Success Measures Beyond Absence Rate; to ensure a rounded view of progress, the following indicators will be monitored:

- Quality and timeliness of Return-to-Work conversations (via audit outcomes)
- Completion rates for mandatory manager training
- Percentage of LTS cases referred to Occupational Health within 28 days
- Compliance with RTW documentation requirements
- Manager engagement with monthly absence data and trigger alerts
- Uptake and outcomes of the MSK pilot and wider wellbeing initiatives

Early Indicators of Improvement; where this forms part of a recurring report, early signs of progress include:

- a gradual increase in the proportion of timely RTW conversations completed
- improved consistency in documentation in areas where targeted support has been provided
- a small rise in early Occupational Health referrals, suggesting better manager awareness
- positive qualitative feedback from managers engaging with the new ER training offer
- early interest and sign up for the MSK pilot, indicating strong demand for preventative support

Impact (Projected)

Year	Projected Reduction in Sickness Absence Rate
Year 1	0.3% (driven by improved consistency and compliance)
Year 2	0.4%
Year 3	0.3%

Review Date:

Feb 2026

Emeka Ezechukwu

People and Workforce Graphs 2

Metric In Development

'Staff Turnover Rate (All Staff)' for this reporting period not available..

Recruitment Time To Hire (Days)

'Recruitment Time To Hire (Days)' is showing 'special cause concern' and that the current process is not consistently achieving the target. - This is a change from the previous month. The figure is currently at 63.

Recruitment Time to Hire is currently reported at 63 days. While part of this increase reflects the introduction of the Vacancy Control Panel and the additional scrutiny required before adverts go live, we are actively implementing measures to streamline the remainder of the process. We are closely monitoring each stage of recruitment to identify and escalate bottlenecks promptly, working collaboratively with hiring managers. These actions are expected to reduce Time to Hire over the coming reporting periods.

Review Date:

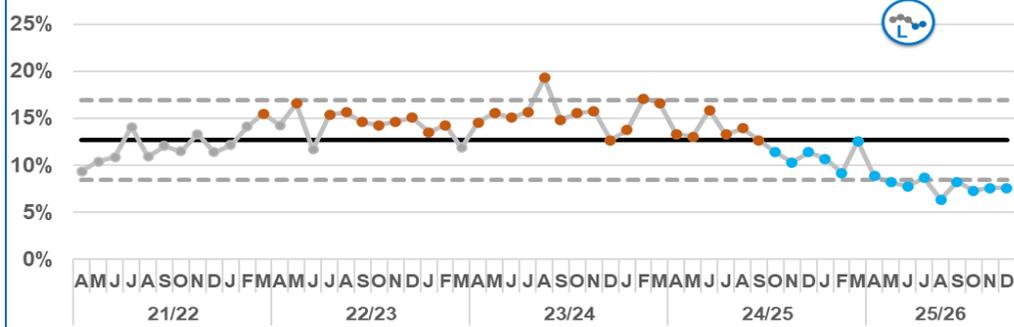

Feb 2026

Action Lead:

Helen Dove

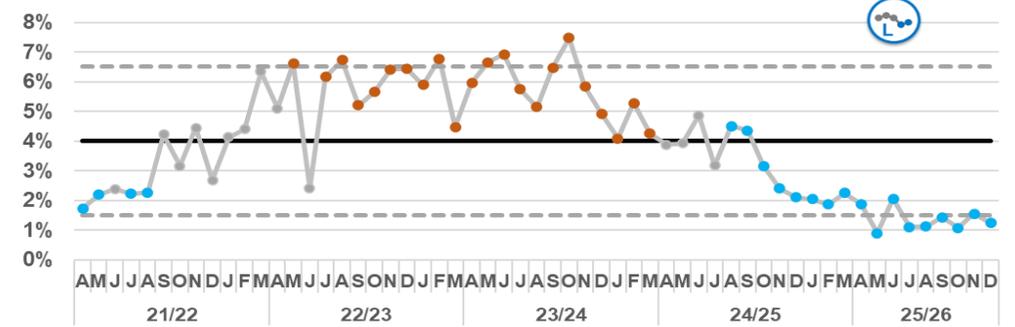

People and Workforce Graphs 3

Proportion of Temporary Staff

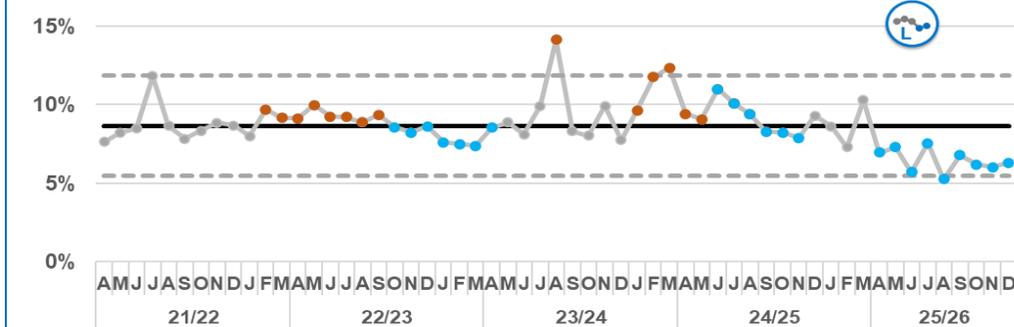

'Proportion of Temporary Staff' is showing 'special cause improvement' (decreasing rate). The figure is currently at 7.6%.

Proportion of Agency Staff

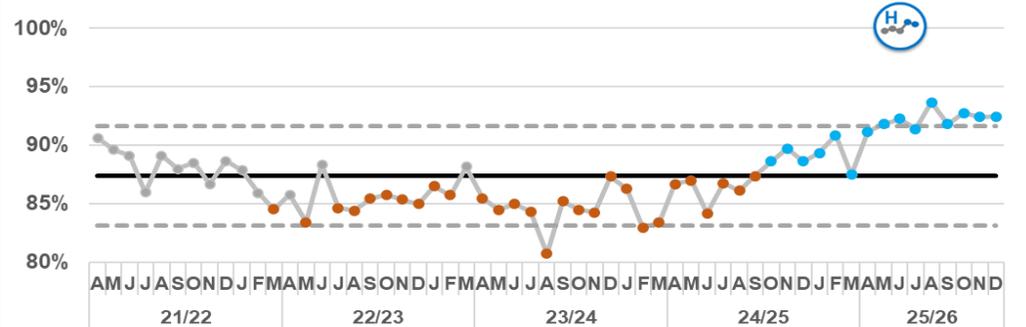

'Proportion of Agency Staff' is showing 'special cause improvement' (decreasing rate). The figure is currently at 1.2%.

Proportion of Bank Staff

'Proportion of Bank Staff' is showing 'special cause improvement' (decreasing rate). The figure is currently at 6.3%.

Proportion of Permanent Staff

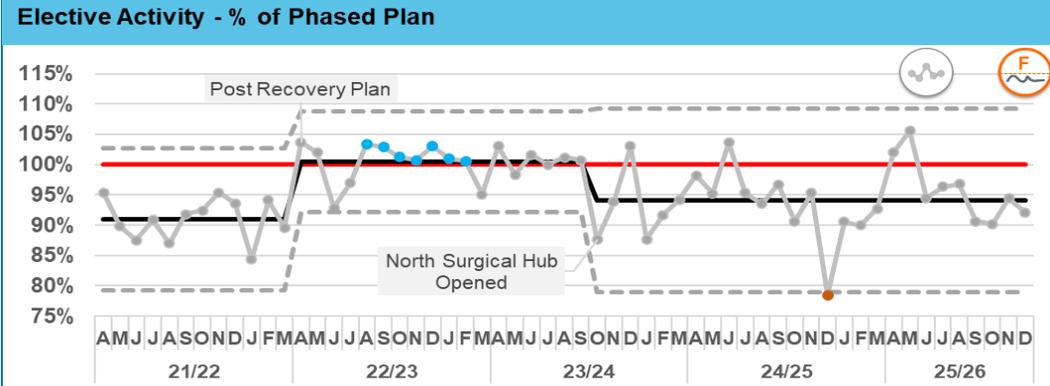

'Proportion of Permanent Staff' is showing 'special cause improvement' (increasing rate). The figure is currently at 92.4%.

- Temporary staffing usage continues to reduce because of increased governance and reporting.
- Temporary staffing request up to 12 weeks require approval form the Executive Vacancy Control Panel
- The reasons for temporary staffing remain the same, vacancy and long term sickness.

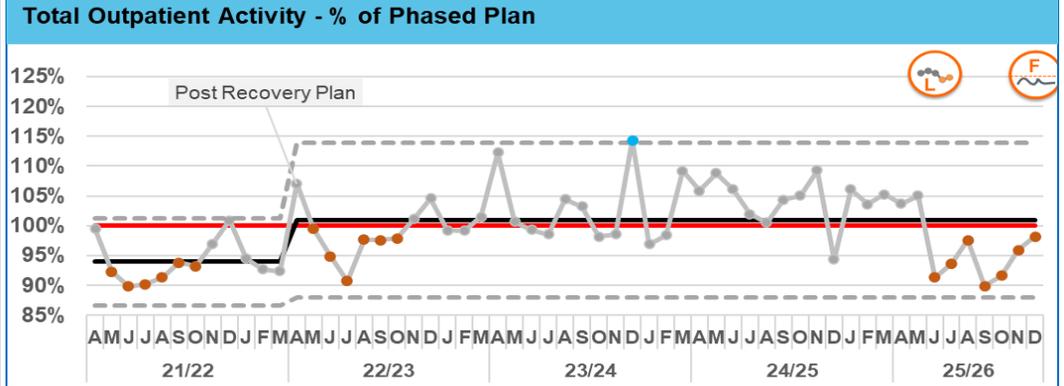

Finance and Productivity

Metric Description	Variation	Assurance	Year to Date	Current Period	Target	Metric Lead	Metric Source	Reporting Frequency
Planned surplus/deficit			-3.5	-1.9	No Target Set	Arthur Vaughan	NHS Oversight Framework	Monthly

Total Outpatient Activity - % of Phased Plan			95.9%	98.2%	≥100%	Jon Spencer	NHS Operational Planning	Monthly
Outpatient First Appointment Activity - % of Phased Plan			96.2%	96.7%	≥100%	Jon Spencer	NHS Operational Planning	Monthly
Outpatient Follow Up Appointment Activity - % of Phased Plan			95.8%	98.6%	≥100%	Jon Spencer	NHS Operational Planning	Monthly
Injections Activity - % of Phased Plan			101.4%	107.6%	≥100%	Jon Spencer	NHS Operational Planning	Monthly

Finance and Productivity (Activity vs. Plan) Graphs 1

'Elective Activity - % of Phased Plan' is showing 'common cause variation' with the current process unlikely to achieve the target. The figure is currently at 92.1%.

'Total Outpatient Activity - % of Phased Plan' is showing 'special cause concern' and that the current process is unlikely to achieve the target. The figure is currently at 98.2%.

Elective Activity

The number of day case admissions reduced to 92.1% in December. Many of the reason for this variance are consistent with the challenges reported in previous months. In North division, demand challenges effecting the year-to-date performance were added to by the challenge of patient availability. Some sites with small waiting lists were unable to populate theatre lists during the Christmas period as patients were unwilling to agree to a date at this time. This capacity was closed and clinicians were diverted to outpatient clinics, which were easier to book and fill.

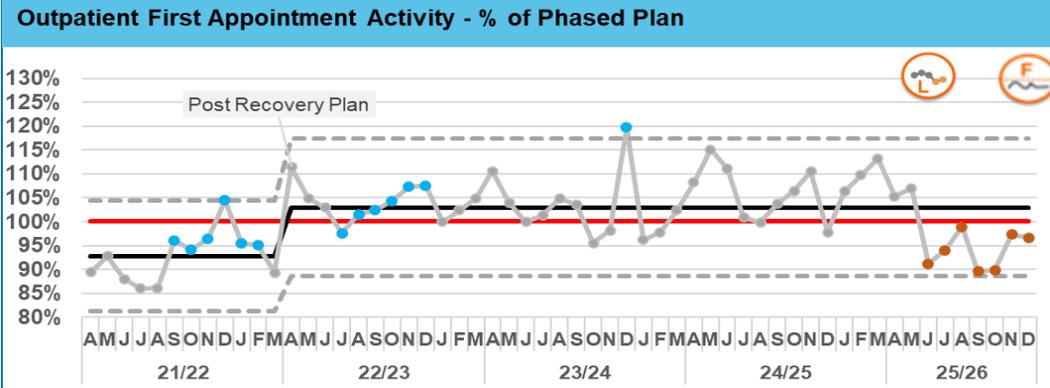

Review Date:

Feb 2026

Kathryn Lennon

Finance and Productivity (Activity vs. Plan) Graphs 2

'Outpatient First Appointment Activity - % of Phased Plan' is showing 'special cause concern' and that the current process is unlikely to achieve the target. The figure is currently at 96.7%.

'Outpatient Follow Up Appointment Activity - % of Phased Plan' is showing 'special cause concern' and that the current process is unlikely to achieve the target. The figure is currently at 98.6%.

First outpatient activity

The number of first outpatient attendances increased to 96.7% in December.

North division were able to exceed the target, as clinicians were redirected from theatre to clinics where patients were available to attend over the Christmas period.

In the South, first outpatient activity reduced with challenges in a small number of services, due to staff absence and patient prioritisation leading to conversion of capacity from new to follow-up.

Follow-up outpatient activity

Follow-up activity was below plan in December, but there was improvement in month to 98.3% and over achievement in South and North division. Staffing issues continue to be addressed proactively. In optometry at City Road, there is a significant adverse variance which is driven by a change in the clinical pathway leading to a reduction in the number of visual field appointments required. This is under review to understand the implications on other service areas and the impact on the activity plan and related resources in 26/27.

Proportion of patients participating in research studies (as a percentage of number of open pathways)			n/a	3.3%	≥2%	Viren Jeram	Internal Measure	Monthly (Month in Arrears)

Improving Health and Reducing Inequality (Discovery) Graphs

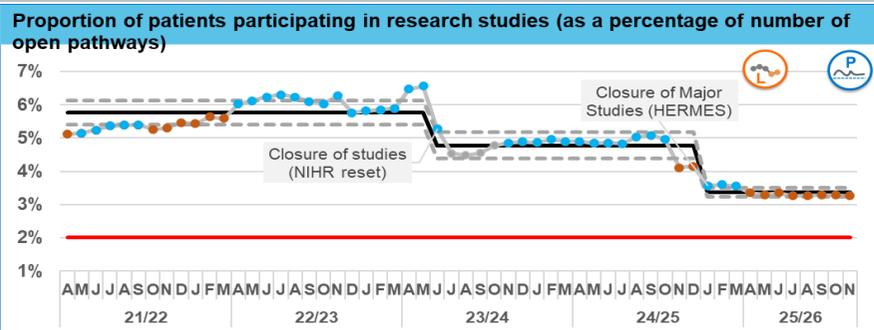

'Active Commercial Studies (open + Closed to Recruitment in follow up)' is showing 'special cause improvement' and that the current process will consistently pass the target.. The figure is currently at 68.

There are currently 68 commercial studies recruiting and in follow up, boosted by the recent opening of several more studies. This metric displays a good level of consistency. This is higher our average across 2024/25 which was 58. Commercial studies are frequently interventional, requiring intensive investigations by skilled multidisciplinary staff and close monitoring. They give our patients access to new Investigational Medicinal Products (IMP) and devices. The current pipeline of 19 hosted studies in "set up" should ensure that we continue to increase recruitment to commercial studies. 12 out of 16 (75%) of commercial studies recruited fully within the target time.

Set-up times for commercial and non-commercial studies continue to improve, some anomalies are still present, mainly due to the complexity of contracting for certain types of studies, which can delay things. There was a slight increase to 52 days median set up time in September and this is still well below the figure of 99 days at the end of December 2024. We continue to look for new innovative methods of shortening the set up time to ensure that studies start recruiting as soon they open.

Review Date: Feb 2026 **Action Lead:** Viren Jeram

'Proportion of patients participating in research studies (as a percentage of number of open pathways)' is showing 'special cause concern' however the current process will consistently pass the target.. The figure is currently at 3.3%.

We continue to place emphasis on, and investment in. patient and public involvement and engagement (PPIE), delivered through the work of our NIHR Biomedical Research Centre (BRC) and Clinical Research Facility (CRF). Our Equity, Diversity, and Inclusion strategy for both the BRC and CRF seeks to increase the diversity of our patients recruited to clinical trials, as well as provide increased opportunities for patients to contribute to research. A process break has been added following the closure of the KAP, HERCULES and NIHR Tissue Bank Bioresource studies. This recognises that the new mean proportion of patients in research is now 3.4%, from the previous level of 4.8%. This is still shown as a concern due to the recent reduction in recruitment level, however we continue to exceed the 2.0% target.

Report title	Monthly Finance Performance Report Month 09 – December 2025
Report from	Arthur Vaughan, Chief Financial Officer
Prepared by	Justin Betts, Deputy Chief Financial Officer
Link to strategic objectives	Deliver financial sustainability as a Trust

Executive summary

For December, the trust is reporting:-

<i>Financial Performance</i> £m	In Month				Year to Date			
	Annual Plan	Plan	Actual	Variance	Plan	Actual	Variance	%
Income	£372.6m	£31.5m	£32.4m	£0.9m	£279.6m	£279.0m	(£0.5m)	(0)%
Pay	(£195.3m)	(£16.2m)	(£16.5m)	(£0.3m)	(£148.7m)	(£148.8m)	(£0.0m)	(0)%
Non Pay	(£133.1m)	(£10.5m)	(£9.7m)	£0.8m	(£101.1m)	(£95.5m)	£5.6m	6%
Financing & Adjustments	(£44.2m)	(£6.6m)	(£6.8m)	(£0.2m)	(£33.2m)	(£32.8m)	£0.4m	1%
CONTROL TOTAL	-	(£1.9m)	(£0.6m)	£1.3m	(£3.5m)	£2.0m	£5.5m	

Income and Expenditure

- A £2.0m surplus year to date compared to a planned deficit of £3.5m; £5.5m favourable to plan.

Efficiency and Productivity

- The Trust is forecasting £14.3m of the £15.1m target required to achieve a break-even financial plan.
- Delivery in December reported £4.4m, with £10.1m delivered cumulatively, highlighting the plan is profiled more towards half two, to allow half one for efficiency scheme identification, implementation and delivery.

Capital Expenditure

- Capital expenditure as of 31st December totalled £101.5m, predominantly linked to Oriel and EPR schemes.
- Business as usual capital £12.3m updated plan; fully committed including provisional sums for ICT migration for which a FBC is outstanding. Expected slippage in this scheme is largely mitigated.
- IFRS 16 budget now £13.8m including bringing forward the Granary Steet lease to this year. Leases have yet to be finalised and this represents a key risk.

Cash

- The cash balance as at the 31st December was £76.6m, a reduction of £9.5m since the end of March 2025.

Quality implications

Patient safety has been considered in the allocation of budgets.

Financial implications

Delivery of the financial control total will result in the Trust being eligible for additional benefits that will support its future development.

Risk implications

Potential risks have been considered within the reported financial position and the financial risk register is discussed at the Audit Committee.

Action Required/Recommendation

The board is asked to consider and discuss the attached report.

2025/26 Monthly Finance Performance Report

Operational Financial Performance

Trust Board
04 February 2026

Updated 16 January 2026

Report Period	M09 December 2025
Presented by	Arthur Vaughan Chief Financial Officer
Written by	Justin Betts Deputy Chief Financial Officer Amit Patel Head of Financial Management Lubna Dharssi Head of Financial Control Richard Allen Head of Income and Contracts

Monthly Finance Performance Report

For the period ended 31st December 2025 (Month 09)

Key Messages

Statement of Comprehensive Income

Financial Position	For December, the trust is reporting:- <ul style="list-style-type: none">A £0.60m deficit in-month against a planned £1.86m deficit, a £1.26m adverse variance to planA £1.99m surplus cumulatively against a planned deficit of £3.49m, £5.47m favourable to plan.
Key Drivers of the Financial Variance	<p>The trusts financial position is being supported by £2.32m of slippage in major projects expenditure, £2.1m clinical supplies non-pay benefits linked to activity below trust plan, demonstrable reductions in bank, agency, whilst income levels are maintained due to fixed contractual income.</p> <p>Key Drivers of the core operational performance include:-</p> <ul style="list-style-type: none">NHS Clinical income is assumed in line with fixed contracts for ERF activity.Clinical divisions are reporting operational activity performance below planned levels.<ul style="list-style-type: none">Elective activity is 92% in December, 95% cumulatively;Outpatients Firsts and Procedures are 96% and 92% respectively cumulatively;St Ann's elective activity is 72% of plans cumulatively.Cataract activity is 94% of plans cumulatively.As a result, clinical divisions are reporting £4.38m adverse to plan cumulatively, with clinical income being £4.65m adverse, pay £1.79m favourable and non-pay including clinical consumables £0.20m favourable. This has been off-set by efficiency under delivery of £2.04m.Corporate departments are reporting £2.92m favourable to plans cumulatively including £2.32m linked to slippage on major strategic projects Moorconnect (EPR) (£1.00m), Oriol (£1.13m), and IT projects (£0.20m) and further underspends (£1.20m) offset by CIP underachievement (£1.12m)Research is reporting a £0.58m adverse variance to plans cumulatively comprised of research costs in excess of study activity and income adverse to plan within the Insight project.Trading areas are £1.10m favourable to plan cumulatively across all commercial units.

Statement of Financial Position

Cash and Working Capital Position	<p>The cash balance as at the 31st December was £76.6m, a reduction of £9.5m since the end of March 2025. This equates to approximately 86 days operating cash.</p> <p>The Better Payment Practice Code (BPPC) performance in December was 96% (volume) and 95% (value) against a target of 95% across both metrics.</p>
Capital	<p>Capital expenditure as of 31st December totalled £101.5m.</p> <ul style="list-style-type: none">Business as usual capital plan, now £12.3m, is fully committed including ICT migration for which the FBC is awaiting finalisation. However, due to expected slippage in this scheme, the current forecast is £10.2m. £1.8m of potential mitigations have been identifiedExternally funded schemes £149.2m plan; £99.0.1m cumulative expenditure including £94.3m of Oriol expenditure and £4.3m for EPR.IFRS16 £13.8m capital plan now including Granary St;

Other Key Information

Efficiencies	<p>The trust has a planned efficiency programme of £15.1m for 2025/26 to deliver the control total.</p>
£15.1m Trust Target	
£10.1m YTD actual	<p>The trust has identified £17.6m of schemes, of which the programme is forecasting £14.3m of delivery, £0.8m adverse to plan.</p> <p>Of the total identified:-</p> <ul style="list-style-type: none">£6.3m is identified central schemes;£0.4m is identified high risks to delivery;£6.8m identified as non-pay schemes;£8.3m is forecast recurrently;
£6.7m of un-identified and non recurrently identified schemes	
	<p>The CIP programme delivery group are progressing further proposed efficiency scheme documentation for additional opportunities to be fully financial validated towards increasing the level of identified and forecast delivery in 2026/27.</p>
Agency Spend	<p>Trust wide agency spend totals £1.95m cumulatively, approximately 1.3% of total employee expenses spend, below the system allocated target of 2.5%.</p>
£1.95m spend YTD 1.3% total pay	<p>Workforce have instigated temporary staffing committees for oversight in relation to managing and reporting temporary staffing agency usage and reasons.</p>

Commentary

Operating Income Total operating income is reporting £32.40m in-month, £0.86m favourable to plan, and £0.52m adverse cumulatively. Key points of note are:-

- £0.86m favourable to plan in month
- Directly commissioned clinical income was £19.38m, £0.07m favourable to plan.
- An in-month contractual deduction of £5.25m (£7.0m FYE) with the NCL ICB has been included relating to unused project funding.
- Underlying elective activity was at 92% (95% cumulatively). Elective activity was below plan in the north-east locality with Stratford activity at 99% and St Anns activity at 53% during December. St Georges were above plan at 111%.
- Commercial trading income was £3.79m, £0.41m favourable to plan.
- Research and Development income at £1.24m, £0.13m adverse to plan
- Other income was on £0.22m favourable to plan.

Employee Expenses December pay is reporting £16.49m (2,755wte); £0.28m adverse to plan. Key points of note are:-

- £0.28m adverse to plan in month
- Substantive pay costs (2,593wte) were £15.23m, higher than the prior 12 month average of £14.96m, and includes the national pay award and employers NI increases
- Temporary staffing costs were £1.20m in December.
 - Agency costs (13wte) are £0.25m in month, lower than the 12-month trend of £0.26m. Use continues mainly on medical staff & administration in both clinical and corporate areas.
 - Bank costs (149wte) are £1.00m in month, lower than the rolling trend of £1.15m. Bank use continues to be mainly in clinical areas and within the medical and clinical admin staffing group.
 - £0.41m unachieved pay CIP (£4.51m cumulatively)

Non-Pay Expenses Non-Pay (exc. financing) costs in December were £16.51m, £0.67m favourable to plan. Key points of note are:-

- £0.67m favourable to plan in month
- Drugs were £0.29m adverse to plan in month with £3.52m expenditure against a 12-month trend of £3.76m. Injections were at 108% of planned activity in month.
- Clinical supplies were £0.11m favourable to plan in month predominantly linked to lower elective activity than planned. Costs were £1.90m in month against a 12-month trend of £2.00m.
- Other non-pay was £1.02m favourable in month with £4.28m expenditure against a 12-month trend of £5.02m.
- £0.06m overachieved non-pay CIP (£0.54m cumulatively overachieved)

ACTIVITY TREND - ERF COMPONENTS

Commentary

NHS Income

Contractual Status

The Trust has finalised contracts from ICB's and signed the documentation on the 17th December. As contracts are finalised, income has been assumed based on the 2025/26 activity delivery to date.

2025/26 Activity performance achievement

- **Inpatient activity** achieved 92% in month and 95% year to date of the revised demand plan.
- **Outpatient Firsts Activity** achieved 96% of the revised demand plan in month; 96% year to date
- **Outpatient Procedures Activity** achieved 71% of revised demand plans in month; 92% cumulatively. Once fully coded this will return to planned levels.

Non ERF Activity performance achievement

- **High Cost Drugs Injections** achieved 108% of activity plans in month; 101% year to date.
- **A&E** achieved 92% of activity plans in month; 105% year to date

ERF Achievement

Final 2024/25 ERF performance to March 2025 has now been published and full year performance is expected to be finalised in December 2025. Final ERF performance is in line with planning expectations.

Activity plans and ERF

Activity plans are based on operational services demand based view of patients waiting for treatment.

- 2024/25 performance for ERF is now confirmed to month 12 but with the year end performance finalised.
- 2025/26 ERF reporting from NHSE will be the same as 2024/25. IAPs are agreed with commissioners regarding the funded levels of activity for this year. Current performance is an estimated £1m behind plan but with expected catch up in Q4.

Activity Plans

The charts to the left demonstrate the in-year activity levels compared to the previous year. The red line represents average 2019/20 activity levels.

Commentary

Cash and Working Capital The cash balance as at the 31st December was £76.6m, a reduction of £9.5m since the end of March 2025.

Capital Expenditure/ Non-current assets Capital expenditure as of 31st December totalled £101.5m, predominantly Oriel related/EPR related.

- Business as usual capital £12.3m
- The budget has been increased by £2.1m with slippage in other NCL organisations. The budget is fully committed but slippage in ICT migration means the current forecast is £10.2m. To mitigate this £1.8m of potential additional spend has so far been identified
 - Critical infrastructure, fire remediation, and high priority EBME equipment have been prioritised along with previously committed expenditure. The Ealing FBC has recently been approved and the budget updated.
 - Remaining capital commitments are being considered subject to finalisation of key projects including, EPR budget programme finalisation, Oriel adjacent costs and ICT BAU and ICT migration to Oriel cost implications.
 - The IFRS16 budget has been increased to £13.8m including bringing forward the Granary Street lease to 2025/26. The budget is marginally over committed including this lease, IT migration and 10-year extensions. However, with none of the leases yet finalised this remains a key risk.

Receivables Receivables have reduced by £0.6m to £12.4m since the end of the 2024/25 financial. Debt in excess of 60 days shows a reduction of £0.8m in December and current debt increased by £1.4m.

Payables Payables totalled £14.0m at the end of December, a reduction of £6.7m since the end of March 2025.

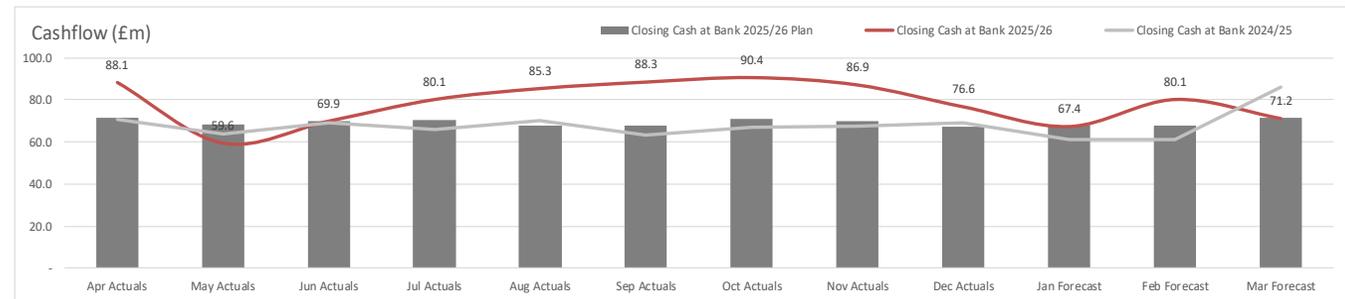

The trust's performance against the 95% Better Payment Practice Code (BPPC) is shown to the left. In aggregate it was:-

- 96% volume of invoices (prior month 96%) and
- 95% value of invoices (prior month 96%).

Commentary

Cash flow The cash balance as at the 31st December was £76.6m, a reduction of £9.5m since the end of March 2025.

The trust currently has 86 days of operating cash (prior month: 98 days).

December cashflow saw a £10.3m outflow against a forecast of £15.3m due to payments for NHS provider SLAs and timing of payments slipping to future months.

The current forecast cash balance to the end of the financial year is £71.2m in line with plan.

TRUST WIDE FORECAST

Forecast Delivery £m

Commentary

Governance & Reporting

The trust had a planned efficiency programme of £15.1m for 2025/26 to deliver the Trust control total.

- Trust efficiencies are managed and reported via the Cost Improvement Programme (CIP) Delivery Group.

In Year Delivery

The trust is reporting efficiency savings achieved of:-

- £4.40m in month, compared to a plan of £1.43m, £2.97m favourable to plan; and
- £10.09m year to date, compared to a plan of £6.53m, £3.56m favourable to plan.

The Trust has an efficiency plan with delivery more towards half two of the financial year.

- Compared to a straight-line savings plan which would assume delivery evenly across the year, the Trust would be reporting £0.65m adverse in month & £0.8m adverse YTD.

Identified Savings

The trust is forecasting £14.3m, £0.8m adverse to plan.

Of the total identified:-

- £6.3m is identified central schemes;
- £0.4m is identified high risks to delivery;
- £6.8m identified as non-pay schemes;
- £8.3m is forecast recurrently;

The CIP programme board are working through further efficiency scheme delivery for full financial validation towards increasing the level of identified and forecast delivery in 2025/26.

£6.7m represents the value of un-identified and non-recurrently identified savings.

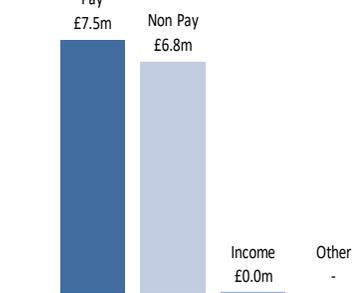

Risk Profiles

The charts to the left demonstrates the

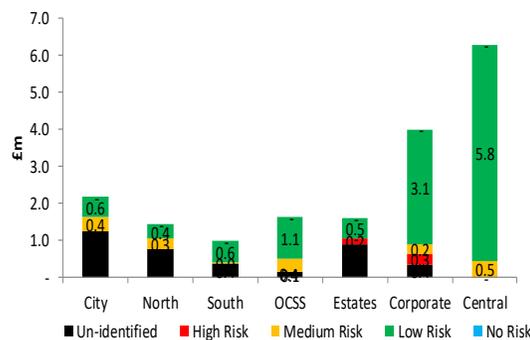

- identified saving by category,
- divisional identification status including risk profiles, and
- the trust wide monthly risk profile changes for identified schemes as the year progresses.

Supplementary Information

Moorfields
Eye Hospital
NHS Foundation Trust

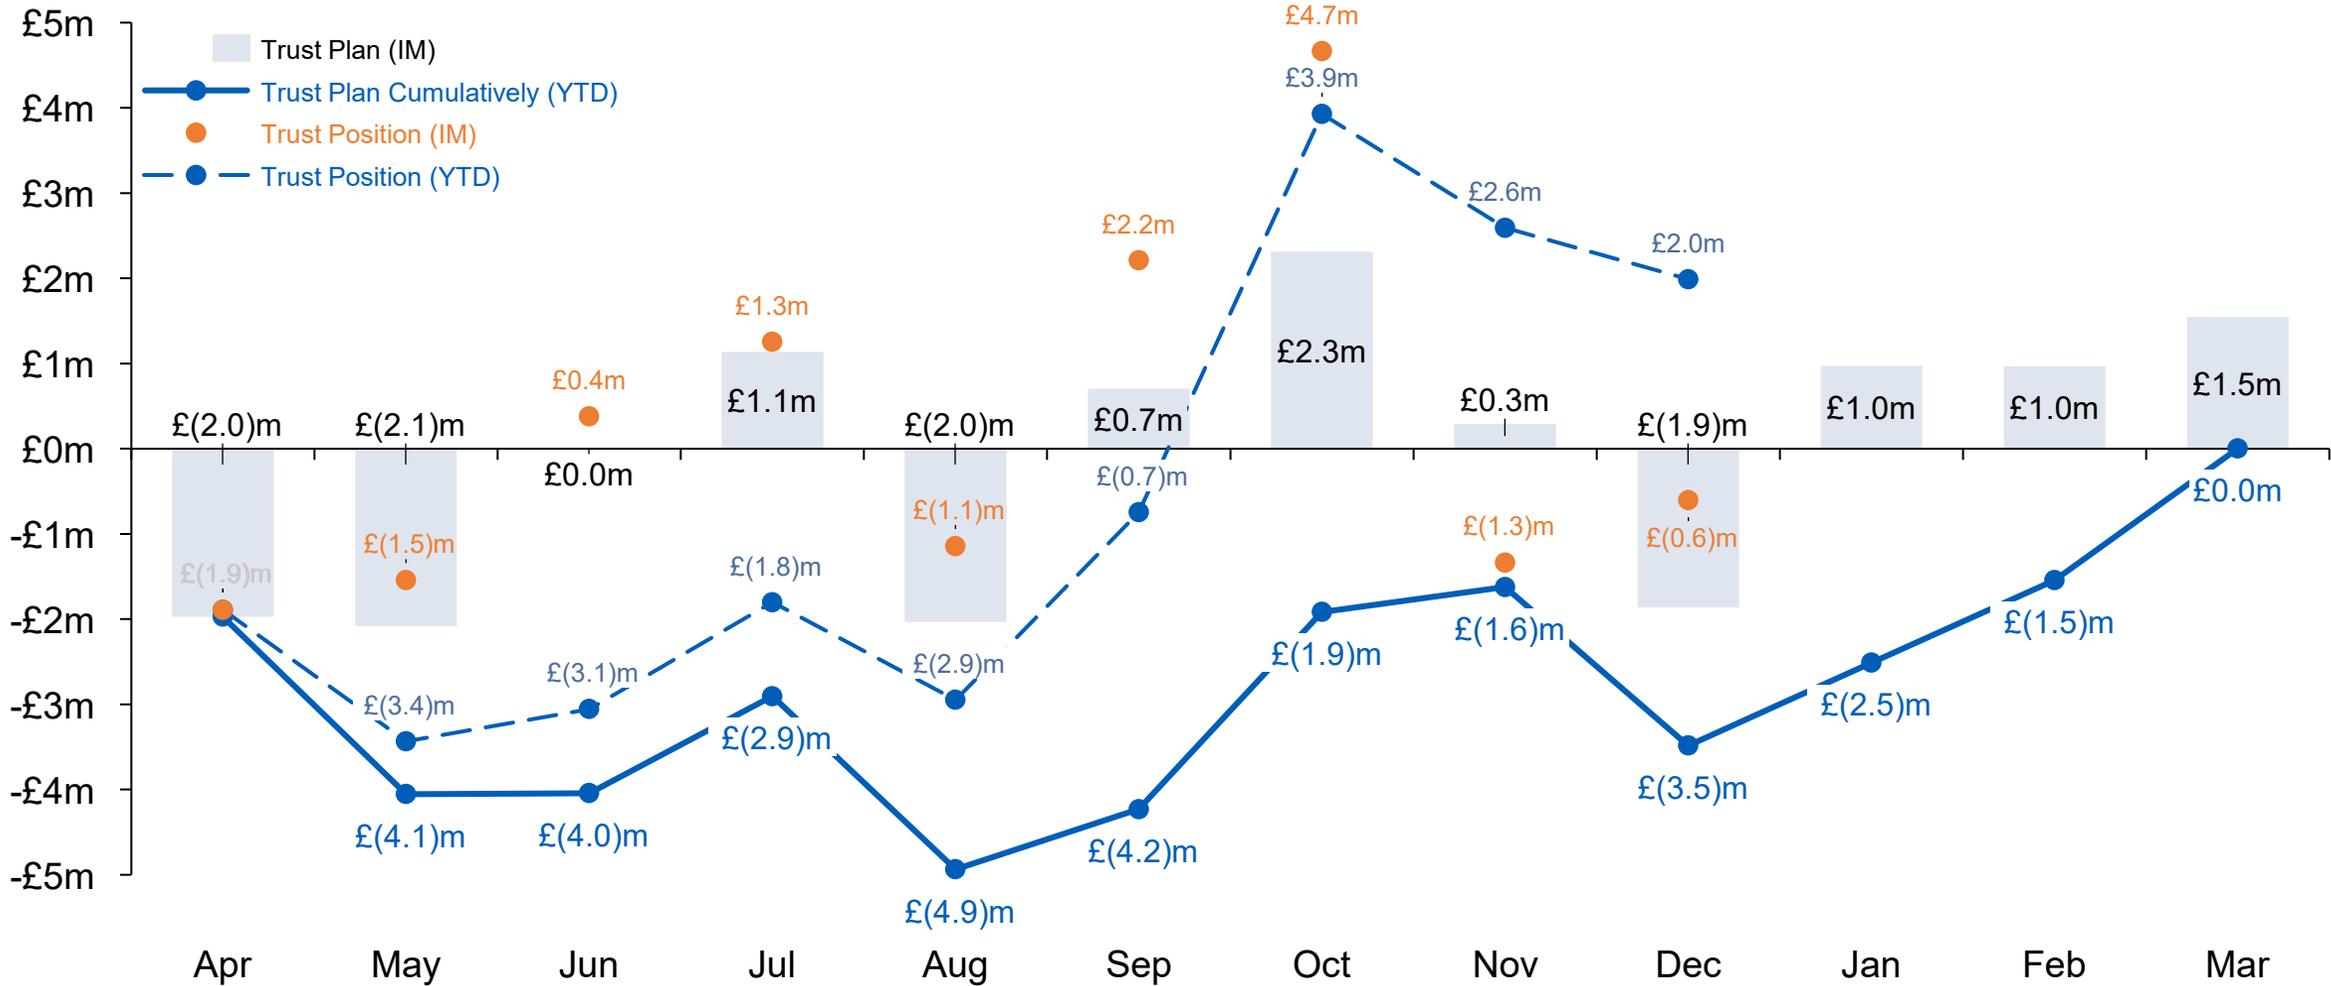

The Trust financial performance is £1.3m deficit in month, £2.6m surplus YTD

For November the trust reported a **£0.6m deficit IM**, £1.3m favourable to the planned deficit of £1.3m in month.

Cumulatively the trust is reporting a **£2.0m surplus YTD**, £5.5m favourable to the £3.5m planned deficit YTD.

The Trusts financial plan is predicated on the delivery of efficiency savings of £15.1m which has a material impact on in month and cumulative financial plans.

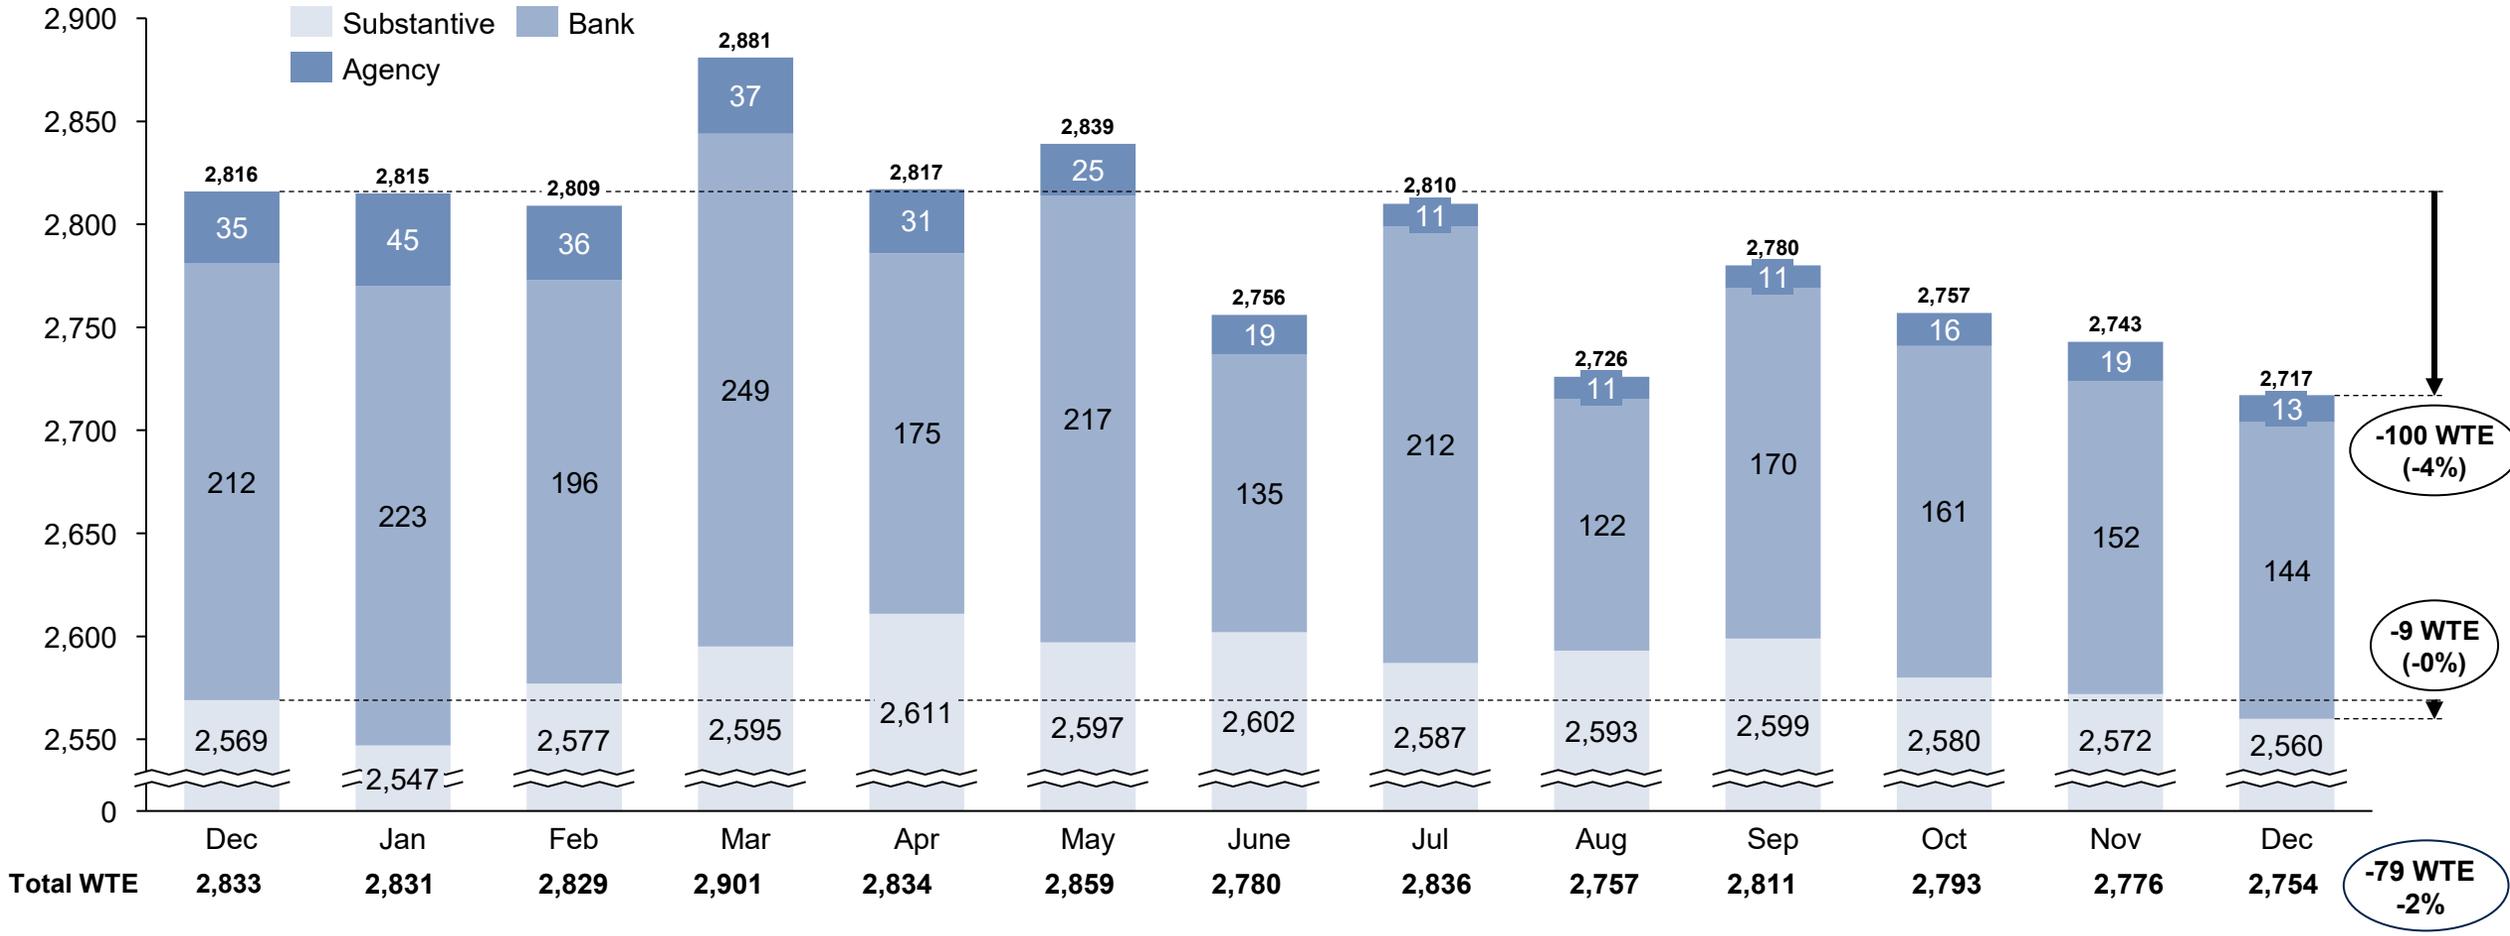

The Trusts financial plan is predicated on typical assumptions for income and expenditure categories as laid out below, including efficiencies which due to its size (£15.1m) has a material impact on in month and cumulative financial plans. Planning assumptions have included:-

- NHS Income based activity plans point of delivery and working days/calendar days adjusted for bank holidays, and leave periods. Pay based on generalised twelfths unless where specifically planned. Non pay clinical supplies matched to NHS clinical activity. Efficiencies profiled on a quarterly phased basis using indicative statuses of scheme identification at the beginning of the year.

Workforce WTE Trend reporting

The below chart reports the worked Whole Time Equivalent (WTE)** for a rolling 12 months, excluding EPR, Oriel, and IT Projects. Total trust WTE is shown below the chart. National planning guidance includes the requirement to reduce spend on temporary staffing[&] and support functions.

- WTE Trends are reported by pay type, staff type, staff group, division and department further in this pack.
- Total WTE **excluding EPR/Oriel and IT** projects have changed by -74 WTE from the same period last year. Substantive staff have changed by +8 WTE.

[&]National planning expectations are agency reductions of 30%, bank reductions of 10%, and corporate support functions to reduce growth since 2018/19 by 50% by quarter 3 of 2025/26

^{*}WTE during March is often impacted by annual leave and backfill and can't be used as a baseline WTE for reductions in year.

[#]Financial ledger WTE reporting has known and legitimate differences to Workforce WTE reporting. Workforce reporting should be used for formal analysis and narrative.

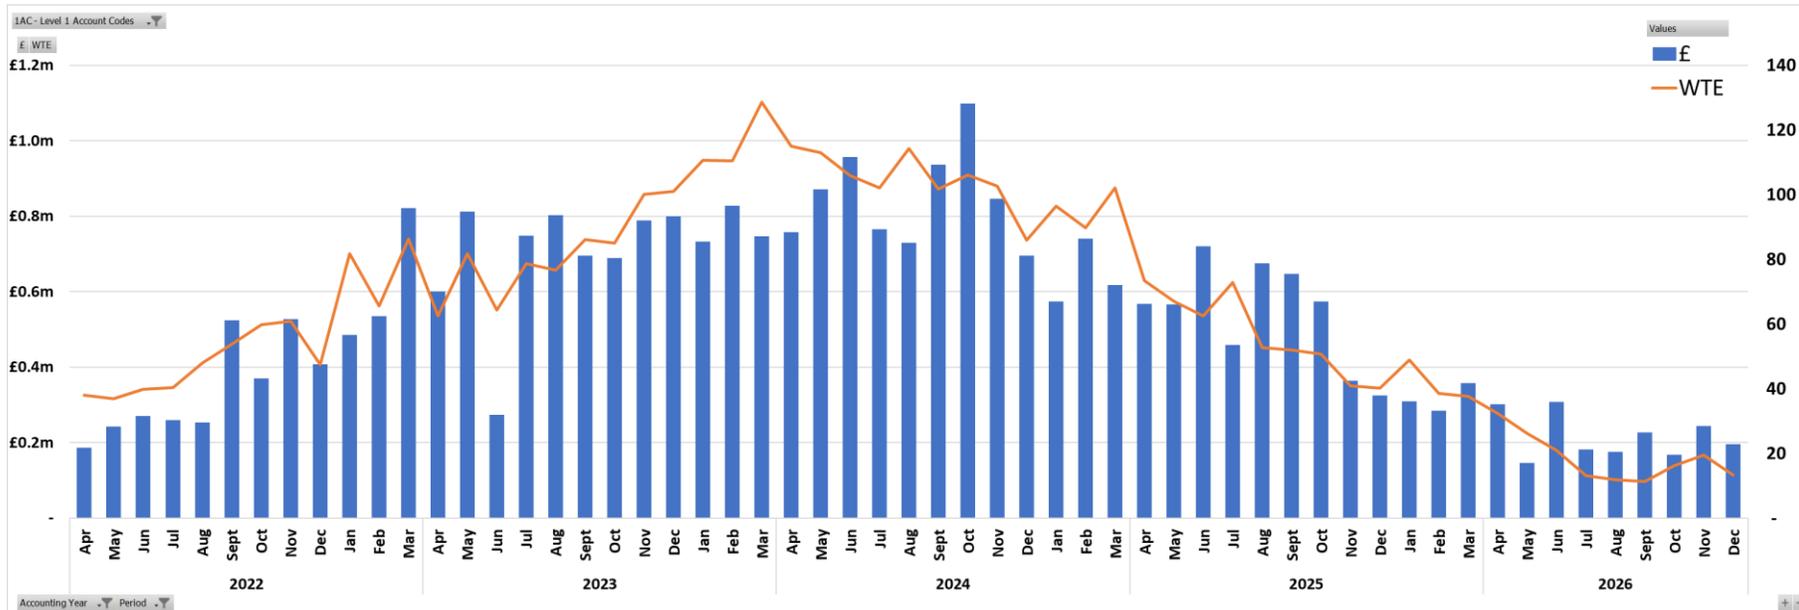

Bank and agency WTE are derived from Healthroster and are subject to staff adding, correcting and finalising rotas in a timely manner, and can including retrospective corrections.

Learning from deaths
(Q2 2025/26)
Board of directors
4 February 2026

Report title	Learning from deaths
Report from	Louisa Wickham, chief medical officer
Prepared by	Julie Nott, head of risk & safety and patient safety specialist
Link to strategic objectives	We will consistently provide an excellent, globally recognised service

<p>Executive summary</p> <p>This report provides an update regarding how we learn from deaths that occur within Moorfields defined by criteria (see Annex below) as set out in trust policy. It is a requirement for all trusts to have a similar policy.</p> <p>The trust has identified one patient deaths in Q2 and Q3 2025/26 that fell within the scope of the learning from deaths policy.</p>							
<p>Quality implications</p> <p>The Board needs to be assured that the trust is able to learn lessons from patient safety incidents, in order to prevent repeat mistakes and minimise patient harm.</p>							
<p>Financial implications</p> <p>Provision of the medical examiner (ME) role for Moorfields may have small cost implications if the service is ever required.</p>							
<p>Risk implications</p> <p>If the trust fails to learn from deaths, then there is clinical risk in relation to our ability to provide safe care to patients leading to possible reputational risk, financial risk of potential litigation and legal risk to directors.</p>							
<p>Action required/recommendation</p> <p>The Board is asked to receive the report for assurance and information.</p>							
For assurance	✓	For decision		For discussion		To note	✓

This report satisfies the requirement to provide the trust board with an update regarding compliance with, and learning from, the NHSE learning from deaths agenda. The 2024/25 data is shown in the table below.

Indicator	Q4 2024/25	Q1 2025/26	Q2 2024/25	Q3 2025/26
Summary Hospital Mortality Indicator (as reported in the IPR)	0	0	0	0
Number of deaths that fall within the scope of the learning from deaths policy (see annex 1)	0	0	1	0
% of cases (in scope) reviewed under the structured judgement review (SJR) methodology	N/A	N/A	100%	N/A
Deaths considered likely to have been avoidable	N/A	N/A	N/A	N/A

Learning and improvement opportunities identified during Q2 and Q3 (including those outside the criteria set out in Annex 1)

1. Notification of a patient death received, City Road (in scope – see annex 1)

During Q1, a request was received from HM Coroner for information regarding a patient who had passed away two days after routine cataract surgery. A copy of the patient’s health record was shared, along with statements from staff regarding pre-assessment and the day of surgery. A structured judgement review was completed by a consultant ophthalmologist and a consultant anaesthetist, and no concerns were identified. Further information regarding the need for on-going involvement from the trust is awaited from the Coroner.

2. Notification of paediatric deaths (not in scope – see annex 1)

Previous learning from deaths reports have identified a concern regarding the receipt of notification when a child under the care of Moorfields passes away. Staff are unaware that the patients had died because notification had not been received via the national deceased registry reports. Previous reviews have identified that proactive notification of a child death is unlikely to be forthcoming, and that details will only appear in national deceased registry reports when an active search of the National Care Record Summary (NCRS) has been undertaken by a member of staff listed to organisation code RP6 (Moorfields).

A further incident has been identified in which notification of a death was not received via the agreed route. When a patient ‘was not brought’ (WNB) to an appointment, a member of staff contacted the patient’s family and was advised that the family had notified the hospital on multiple occasions. Continued contact with the family was causing them great distress.

The WNB policy now specifies that clinicians are required to check Spine for any child safeguarding related information for any paediatric patients that were not brought to any

clinical appointments. It is anticipated that this review will enable the proactive identification of a patient death, prior to contact being made with a bereaved family.

3. Notification of a patient death received, Croydon (currently not in scope – see annex 1)

During the review of a patient fall incident, it was identified that a patient was deceased. The patient had attended an outpatient appointment and was observed to be unsteady on his feet prior to falling. He was reviewed in A&E prior to discharge.

It has since become apparent that the patient passed away at home several days after the incident, and that the London Ambulance Service has made a direct referral to the Coroner. The incident is currently out of scope as a request for information from the Coroner is yet to be received. The incident has been reviewed by the incident review group.

Annex 1

Included within the scope of this policy:

1. All in-patient deaths.
2. Patients who die within 30 days of discharge from inpatient services (where the Trust becomes aware of the death).
3. Mandated patient groups identified by the NQB Learning from Deaths guidance including individuals with a learning disability, mental health needs or an infant or child.
4. The death of any patient who is transferred from a Moorfields site and who dies following admission to another provider hospital.
5. The death of any patient, of which the trust is made aware, within 48 hours of surgery.
6. All deaths where bereaved families and carers, or staff, have raised a significant concern about the quality of care provision by Moorfields.
7. Deaths of which the trust becomes aware following notification, and a request for information, by HM Coroner.
8. Persons who sustain injury as a result of an accident (e.g. a fall down stairs) whilst on Trust premises and who subsequently die.
9. Individual deaths identified by the Medical Examiner or through incident reporting or complaints or as a result of the Inquest process.

Excluded from the scope of this Policy:

1. People who are not patients who become unwell whilst on trust premises and subsequently die.

Meeting:	Board of Directors						
Date:	4 February 2026						
Report title:	Summary of the Finance and Performance Committee						
Lead executives	Arthur Vaughan, CFO and Jon Spencer, COO						
Report Author	Jennie Phillips, Deputy Company Secretary						
Presented by	David Hills, non-executive director						
Status	For assurance and noting						
Link to strategic objectives	We are able to deliver a sustainable financial model.						
Brief summary of report							
Attached is a brief summary of the Finance and Performance Committee (FPC), meeting which took place on 14 January 2026.							
The committee also met on 15 December 2025 to review and approve the draft trust plan submission, and again on 2 February 2026 to review and endorse the final trust plan submission for Board approval on 4 February.							
Action Required/Recommendation.							
The board is asked to:							
<ul style="list-style-type: none"> Note the report of the Finance and Performance Committee and gain assurance from it.

FINANCE & PERFORMANCE COMMITTEE SUMMARY REPORT	
Governance	<ul style="list-style-type: none"> • Quorate – Yes
Current activity (as at date of meeting)	<p>2025/26 Financial performance (Month 8)</p> <ul style="list-style-type: none"> • Reported £2.6m surplus driven by slippage on major projects, which is expected to be funded in the next year, and by current activity levels: • Cash position strong at £86.9m, above plan due to capital slippage. • Improved cost control across services acknowledged as a key driver of financial stability. • <i>Cost improvement programme</i> (CIP) forecast: £15–16m total delivery expected, with £8–9m confirmed recurrent.
	<p>2025/26 Financial forecast</p> <ul style="list-style-type: none"> • Trust planning to deliver FY25/26 financial plan in full
	<p>2025/26 Operational performance</p> <ul style="list-style-type: none"> • <i>Referral to treatment</i> (RTT) at 83.5%, previously 84.6% pre-Christmas; recovery actions underway to meet 87% year-end target. • 65-week waits: Two remaining, plus four newly identified due to admin error; all expected to be cleared by end of February. • 52-week waits stabilised; expected to reduce to single figures next year. • Mutual aid to King's: will be managed to avoid internal 65-week breaches. • Digital initiatives (Wayfinder, AI) progressing to reduce patient contact burden. • Sickness absence, appraisal rates and information governance compliance identified as requiring focus ahead of <i>electronic patient record</i> (EPR) go-live.
	<p>2025/26 Productivity</p> <ul style="list-style-type: none"> • Theatre utilisation improving, highest in November; continued work to reach best practice. • Cataract lists below <i>getting it right first time</i> (GIRFT) standard of eight cases per session. The committee requested a benchmarking report of cataract activity per list against peer providers. • Follow-up <i>did not attend</i> (DNA) rates improving; new patient DNAs remain above target. • Divisional engagement strong; actions now in delivery phase.
	<p>2025/26 CIP delivery</p> <ul style="list-style-type: none"> • £10.7m confirmed CIP, rising to £11.8m with pipeline schemes. • £4.4m contract income over-performance being recognised as recurrent to meet plan. • Divisional CIP planning well engaged, supported by executive-led workshops.
	<p>Divisional update – OCSS</p> <ul style="list-style-type: none"> • Delivered £1.2m recurrent efficiencies (25% of Trust total). • Workforce challenges in optometry and orthoptics; skill mix reviews underway. • Access function and demand/capacity planning remain priorities. • Divisional EPR and Oriel risks remain at programme level until transition.
	<p>Moorfields Private recovery plan</p> <ul style="list-style-type: none"> • Recovered well in Q2 and Q3 following consultant absence-related Q1 dip. • Forecast above plan, maintaining cost control. • Recognised as an exemplar of financial discipline.

	Any risks and issues for escalation <ul style="list-style-type: none">• There were no risks identified not already recorded in the registers.
	AOB <ul style="list-style-type: none">• There was no other business.
Date of next meeting	18 March 2026

Summary report of the **Quality and Safety
Committee** Meeting on 27 January 2026

Board of directors
4 February 2026

Report title	Summary report of the Quality and Safety Committee Meeting on 27 January 2026		
Report from	Michael Marsh, Chair of the Quality and Safety Committee		
Prepared by	David Flintham, Quality and Compliance Manager Ian Tombleson, Director of Quality and Safety		
Previously considered at	Quality and Safety Committee	Date	27/01/2026
Link to strategic objectives	We will consistently provide an excellent, globally recognised service		

Quality implications This report provides a summary of the committee’s meeting held on 27 January 2026. It outlines the items discussed at the meeting and highlights any issues for the attention of the board.							
Financial implications None.							
Risk implications No specific risk escalations from this meeting. There are, however, five points which are highlighted for the Board’s specific attention.							
Action required/recommendation. The board is asked to note the report of the Quality and Safety Committee.							
For assurance	X	For decision		For discussion		To note	

**QUALITY AND SAFETY COMMITTEE
SUMMARY REPORT**

27 January 2026

<p>Committee Governance</p>	<ul style="list-style-type: none"> • Quorate – Yes • Attendance – 71% (5 of 7 members) • Action completion status (due items) – 100% • Agenda completed – yes
<p>Current activity and concerns</p>	<p>Presentation by Ophthalmology and Clinical Support Services (O&CSS) Division</p> <p>QSC received a presentation by O&CSS. The following points were highlighted:</p> <ul style="list-style-type: none"> • A focus was on EPR (<i>MoorConnect</i>) and Oriel and the effect this is having on the division; • The division maintains a very good overall external inspection and accreditation status. <p>Infection Control Update</p> <p>The regular infection control (IPC) update was presented. The following issues were highlighted:</p> <ul style="list-style-type: none"> • Overall compliance remains green - there was one endophthalmitis case in December • Flu vaccination rate for front-line staff is just below target – Moorfields is second in London. <p>Patient Safety Incidents</p> <p>There were no patient safety incident investigation (PSII) reports. The regular duty of candour report was presented. The following were highlighted:</p> <ul style="list-style-type: none"> • Apologies made are not always reflected in the patient notes • Training rates are good. The challenge is about giving staff the confidence to apologise and record this accurately and in a timely way. <p>Patient Safety Incident Response Framework (PSIRF)</p> <p>QSC received an update about PSIRF as part of its 18-month review. The following were highlighted:</p> <ul style="list-style-type: none"> • Learning has been a key component of the review. This has led to some changes to the process; • The review has demonstrated process improvements, especially improved rigour; • There is a focus on digital clinical safety, especially as it moves from niche to mainstream; • Harm does not drive PSIRF, but the level of harm does prioritise incident review. <p>Fire Safety Update</p> <p>The regular fire safety update was presented. The following issues were highlighted:</p> <ul style="list-style-type: none"> • Local coordination of fire drills with host trusts is in progress; • The local fire brigade has recommended the use of ‘seek and search’ (a 5-minute phase between the alarm being raised and the fire brigade being summoned). This will be trialled at City Road. <p>Bedford Improvement Update</p> <p>The committee received an update about the on-going improvement works at Bedford. The following issues were highlighted:</p> <ul style="list-style-type: none"> • Good progress is being made across all areas • The local ICB has committed to contract directly with Moorfields

	<ul style="list-style-type: none"> IT implementation is on target - future deadlines are tight if Bedford is going to align with <i>MoorConnect</i> in October 2026. <p>Quality improvement</p> <p>The committee received an update about quality improvement. The following were highlighted:</p> <ul style="list-style-type: none"> Quality improvement at Moorfields aligns with NHS Impact There is a focus on operational improvement training and rolling this out further A local improvement network has been established and various tools, including training are accessible via <i>eyeQ</i>. <p>Financial decisions and mitigation assurance</p> <p>QSC received an update about financial decisions and mitigation assurance. The following issues were highlighted:</p> <ul style="list-style-type: none"> Evidence demonstrates that the current panel-based approach has been effective RTT (referral to treatment) numbers are improving and Moorfields is likely to hit 86% (87% is the target). There will continue be significant challenges with this over the next two years. <p>Quality and Safety</p> <p>The committee received the Q&S update and the Q3 Q&S reports (Trust-wide, Private, and UAE). The following were highlighted:</p> <ul style="list-style-type: none"> Work is progressing with the quality priorities for 2026/27 Complaints improvement is currently on target and is halfway through the recovery plan - the backlog has been considerably reduced There is a change in consumer protect legislation which has implications for complaints about the supply of lenses in Moorfields Private. <p>Reports from Other Committees</p> <p>Summary reports from the following committees were circulated:</p> <ul style="list-style-type: none"> Risk & Safety Committee (03/12/2025) Clinical Governance Committee (08/12/2025) Information Governance Committee (02/12/2025) <p>Any other business</p> <p>Niaz Islam was thanked for all his support and attendance at the committee.</p>
<p>Board awareness and escalations</p>	<p>Five items are highlighted for the Trust Board’s attention:</p> <ul style="list-style-type: none"> Current accreditations will need to be reviewed, revised and re-inspected as a result of Oriol. This has a significant impact on O&CSS division within which much of this accreditation sits. The PSIRF policy and plan has undergone its scheduled review and has been revised as a result of learning and experience from the previous 18-months. It has been approved by Q&SC. Improvement continues to be made at Bedford. The critical next steps are around IT implementation. The Trust’s quality improvement process is consistent with NHS Impact, and the Board’s development day will include an overview. An image incident review is coming to a conclusion. No harm is expected to have been caused. It is unclear as to the cause of the incident. Regulators have been informed.
<p>Date of next meeting</p>	<p>17 March 2026</p>

Meeting:	Board of Directors						
Date:	4 February 2026						
Report title:	Summary of the Major Projects & Digital Committee (MPDC)						
Lead executives	Jon Spencer, COO						
Report Author	Jennie Phillips, Deputy Company Secretary						
Presented by	Aaron Rajan, non-executive director and David Hills, non-executive director and committee co-chairs						
Status	For assurance and noting						
Link to strategic objectives	We are able to deliver a sustainable financial model.						
Brief summary of report							
Attached is a summary of the Major Projects & Digital Committee, meeting which took place on 21 January 2026.							
Action Required/Recommendation.							
The board is asked to:							
<ul style="list-style-type: none"> Note the report of the Major Projects & Digital Committee and gain assurance from it.

DISCOVERY & COMMERCIAL COMMITTEE SUMMARY REPORT	
Governance	<ul style="list-style-type: none"> • Quorate – Yes
Current activity (as at date of meeting)	<p>Oriel</p> <ul style="list-style-type: none"> • The Oriel site closure over the Christmas period had cause minor delays, though the project remained broadly on track with architectural completion expected September 2026. • The naming of the new building had been delayed. • The committee reviewed the Oriel engagement plan which outlined the patient and staff engagement stakeholder groups being established.
	<p>One Granary Street</p> <ul style="list-style-type: none"> • The tender process for the fit out of One Granary Street was progressing well. • The committee supported bringing the signing of the lease forward and would be bringing a recommendation to the board for approval on 4 February 2026.
	<p>Bedford update</p> <ul style="list-style-type: none"> • The committee received plans of the patient data migration and IT system harmonisation of the Bedford systems. Full integration was scheduled for April 2026.
	<p>MoorConnect (electronic patient record system)</p> <ul style="list-style-type: none"> • The MoorConnect program continued to progress. Governance had been strengthened with a new change control board to expedite scope and decision escalations.
	<p>Single point of access update</p> <ul style="list-style-type: none"> • Progress updates were received on single point of access tenders. • The team were working closely with NHS England to develop the new digital triage pathways which would benefit cataract, adnexal and emergency referrals.
	<p>Any risks identified at the meeting</p> <ul style="list-style-type: none"> • There were no new risks identified at the meeting.
Date of next meeting	11 March 2026
